This book considers a number of research topics in graph theory and its applications, including ideas devoted to alpha-discrepancy, strongly perfect graphs, reconstruction conjectures, graph invariants, hereditary classes of graphs, and embedding graphs on topological surfaces. It also discusses applications of graph theory, such as transport networks and hazard assessments based on unified networks. The book is ideal for developers of grant proposals and researchers interested in exploring new areas of graph theory and its applications. The use of human subjects in biomedical research has increased rapidly with scientific discoveries. However, the failure to achieve the highest—or even adequate—standards of professional moral concern and

behavior is a serious side effect. Research on Human Subjects is based on four years of intensive research in which two studies were completed—one on a nationally representative sample of biomedical research institutions, the second on a sample of 350 researchers who actually used human subjects. The authors explore prevalent ethical norms, the actual ethical behavior of scientists, and the dilemma between the values of humane therapy and scientific discovery. They document the inadequate training that biomedical researchers receive in the ethics of research on human subjects, not only in medical schools but in post-graduate training as well. This landmark work makes very specific suggestions for policy change and reform for the biomedical research profession and its employment of human subjects. researchers may have a general idea for a topic they would like to research, but have a difficult time settling on a more specific topic and its associated research questions. Addressing this problem, this book features contributions from over thirty diverse and experienced research supervisors, mentors, and principal investigators in the field of language teacher education. The chapters are autobiographic in nature, with each contributing author reflecting on relevant, current and innovative research topics through the lens of their own professional life and research work. Offering explicit research topics and strategies for each area of expertise, this book will serve as a useful reference for the seasoned qualitative or narrative researcher, and a helpful guide for new researchers and teacher researchers narrowing down their own research topics. Key Topics in Surgical Research and Methodology represents a comprehensive reference text accessible to the

surgeon embarking on an academic career. Key themes emphasize and summarize the text. Four key elements are covered, i.e. Surgical Research, Research Methodology, Practical Problems and Solutions on Research as well as Recent Developments and Future Prospects in Surgical Research and Practice. Presents dozens of writing prompts designed to help elementary students learn more about topics related to social studies. The aim of the Ebook series of Research Topics in Agricultural & Applied Economics (RTAAE) is to publish high quality economic researches applied to both the agricultural and non-agricultural sectors of the economy. The subject areas of this Ebook series include, among others, supply and demand analysis, technical change and productivity, industrial organization, labor economics, growth and development, environmental economics, marketing, business economics and finance. By covering a broad

variety of economic research topics, this Ebook series should prove to be of considerable interest to a w. More information: www.jvank.nl/ARMSelected Advising on research methods: Selected topics 2012 results from a research master course Methodological Advice that was given at the University of Amsterdam, fall 2012 by Don Mellenbergh and Herman Adèr. The objectives of this course were: (a) to acquire methodological knowledge that is needed for advising researchers in the behavioral and social sciences, and (b) to get experience with methodological consultancy. The main material for the course was the book: Advising on research methods: a consultant's companion by Herman J. Adèr and Gideon J. Mellenbergh (with contributions by David J. Hand). The students had to fulfill various assignments, one of which was to write a paper on a topic that may come up during methodological consultancy. In the beginning

of the course, paper topics were selected from a list of relevant methodological issues. The publication process of drafting, submitting, reviewing, adapting and correcting was the same as in the production of any other edited paper collection. This book constitutes the thoroughly refereed post-proceedings of the First International Workshop on Topic Map Research and Applications, held in October 2005. The 17 revised full papers and five revised short papers presented together with one invited lecture were carefully selected during two rounds of reviewing and improvement from more than 35 submissions. One of the goals of the workshop is to survey and structure the field of topic map research and the emerging topic map technologies. THE RESEARCH WRITER helps students transition from writing the research paper to doing research writing, from reporting information to working with ideas. The subtitle--Curiosity, Discovery,

Dialogue--signals this shift: this handbook promotes research as a curiosity-driven activity that leads to discoveries that are then shared through various types of dialogue. With this practical and reader-friendly handbook, students will learn the research and writing skills needed for any research project and will be able to apply and transfer these skills to their own disciplines. Students can use THE RESEARCH WRITER to become more intelligent, ethically aware researchers, able not just to avoid plagiarism but to write with credibility while navigating the twenty-first century digital landscape. Disha's BESTSELLER "23 Years CSAT General Studies IAS Prelims & Mains Topic-wise Solved Papers (1995-2017)" consists of past years solved papers of the General Studies Paper 1 & 2 distributed into 8 Units and 52

Topics. This is the 8th edition of the book and has been thoroughly revised and updated. The book has been designed in 2 colour so as to make it more student friendly. The book also provides Essays divided topic-wise from 1993-2016. The strength of the book lies in the Errorless DETAILED Solutions. The book is 100% useful for both the General Studies papers (1 and 2) of the Prelims/ CSAT. Apply your intellect to the exercises found in this unique text. The problems in science, history, political science, linguistics, mathematics, social theory, and philosophy are designed for readers who are able to look beyond the seemingly obvious for answers. Although this text is applicable to a wide-ranging readership, one suggested application would be in the sphere of higher education, where it could be used to help students develop lateral thinking skills. The text also provides suggested research topics to further advance these skills. All readers will improve their creativity and gain a

broader, more enriched world view. MCDM 2009, the 20th International Conference on Multiple-Criteria Decision Making, emerged as a global forum dedicated to the sharing of original research results and practical development experiences among researchers and application developers from different multiple-criteria decision making-related areas such as multiple-criteria decision aiding, multiple criteria classification, ranking, and sorting, multiple objective continuous and combinatorial optimization, multiple objective metaheuristics, multiple-criteria decision making and preference modeling, and fuzzy multiple-criteria decision making. The theme for MCDM 2009 was "New State of MCDM in the 21st Century." The conference seeks solutions to challenging problems facing the development of multiple-criteria decision making, and shapes future directions of research by promoting high-quality, novel and daring research findings. With the

MCDM conference, these new challenges and tools can easily be shared with the multiple-criteria decision making community. The workshop program included nine workshops which focused on different topics in new research challenges and initiatives of MCDM. We received more than 350 submissions for all the workshops, out of which 121 were accepted. This includes 72 regular papers and 49 short papers. We would like to thank all workshop organizers and the Program Committee for the excellent work in maintaining the conference's standing for high-quality papers.
