"The Pragmatics of Defining Religion" is a multidisciplinary volume on the problem of the definition of religion with chapters on the polemics of defining religion in modern contexts, the history of the concept of religion, the methodology of its definition; it includes several definition proposals. A collection of essays that illustrate the issue of definition and the role of context in the study of a religion, its text and its ideas. The author first addresses an important text in the canon of Judaism in its

formative age. He then places the text in its context; that is, he tries to find the question that the text answers. The author concludes by offering a general theory of the history of Judaism so that Judaisms and their histories can be included in the larger history of religion. Co-published with *Studies in Judaism. Differing from the first volume's more theoretical focus, this volume analyzes more common first order descriptive terms that are used throughout the field, inviting readers to theorize their traditional vocabulary. Topics covered include: - Atheism/Theism - Authority - Ceremony - Conversion - Cult - Evil - Faith - Fundamentalism - Idol - Magic - Pilgrimage - Ritual - Sacrifice - Scripture - Superstition - Tolerance - Worship *Religion in 50 More Words* submits such terms to a critical interrogation and subsequent redescription. This paves the way for a collective and more critical reframing of the field. The volume, along with *Religion in 50 Words*, provides an indispensable resource for students and academics working in the field of religious studies and related disciplines. This book addresses cult and religion in the city of Corinth from the 4th to 7th centuries of our era. The work incorporates and synthesizes all available evidence, literary, archaeological and other. The interaction and conflict between Christian and non-Christian activity is placed into its urban context and seen as simultaneously existing and overlapping cultural activity. Late antique religion is defined as cult-based rather than doctrinally-based, and thus this volume focuses not on what people believed, but rather what they did. An emphasis on cult activity reveals a variety of types of interaction between groups, ranging from confrontational events at dilapidated polytheist cult sites, to full polysemous and shared cult activity at the so-called "Fountain of the Lamps." Non-Christian traditions are shown to have been recognized and viable through the sixth century. The tentative conclusion is drawn that a clear definition of "pagan" and "Christian" begins at an urban level with the Christian re-monumentalization of Corinth with basilicas. The disappearance of "pagan" cult is best attributed to the development of a new city socially and physically based in Christianity, rather than any purely "religious" development. Talk about God is often the source of controversy. Theists and atheists are equally passionate when making their stand for or against belief in God. In this book, a wide range of philosophers of religion have come together to discuss how serious talk about God ought to be conducted for theists and atheists alike in what should be their common pursuit for truth. The essays both address methodological questions and provide a range of concrete samples of serious God-talk, spanning from political, religion, and classical proofs of God's existence to the problem of evil. (Series: Nordic Studies in Theology / Nordische Studien zur Atheism, Vol. 4) [Subject: Religious Studies] Volume V distinguishes religious and spiritual education and takes a multi-faith approach to pedagogic, curricular and resource issues. An introduction to Ásatrú, also called Odinism, the native religion of the Teutonic peoples, discussing the basic philosophic and moral ideals of this ancient belief system. "The fastest growing religion in America is--none! Among adults under 30, those poised to be the parents of the next generation, fully one third are religiously unaffiliated. Yet these "Nones," especially parents, still face prejudice in a culture where religion is widely seen as good for your kids. What do Nones believe, and how do they negotiate tensions with those convinced that they ought to provide their children with a religious upbringing?"--Publisher description. Manga and anime (illustrated serial novels and animated films) are highly influential Japanese entertainment media that boast tremendous domestic consumption as well as worldwide distribution and an international audience. *Drawing on Tradition* examines religious aspects of the culture of manga and anime production and consumption through a methodological synthesis of narrative and visual analysis, history, and ethnography. Rather than merely describing the incidence of religions such as Buddhism or Shinto in these media, Jolyon Baraka Thomas shows that authors and audiences create and re-create "religious frames of mind" through their imaginative and ritualized interactions with illustrated worlds. Manga and anime therefore not only contribute to familiarity with traditional religious doctrines and imagery, but also allow authors, directors, and audiences to modify and elaborate upon such traditional tropes, sometimes creating hitherto unforeseen religious ideas and practices. The book takes play seriously by highlighting these recursive relationships between recreation and religion, emphasizing throughout the double sense of play as entertainment and play as adulteration (i.e., the whimsical or parodic representation of religious figures, doctrines, and imagery). Building on recent developments in academic studies of manga and anime—as well as on recent advances in the study of religion as related to art and film—Thomas demonstrates that the specific aesthetic qualities and industrial dispositions of manga and anime invite practices of rendition and reception that can and do influence the ways that religious institutions and lay authors have attempted to captivate new audiences. *Drawing on Tradition* will appeal to both the dilettante and the specialist: Fans and self-professed otaku will find an engaging academic perspective on often overlooked facets of the media and culture of manga and anime, while scholars and students of religion will discover a fresh approach to the complicated relationships between religion and visual media, religion and quotidian practice, and the putative differences between "traditional" and "new" religions.
