Traces of Trauma Feb 24 2020 How do the people of a morally shattered culture and nation find ways to go on living? Cambodians confronted this challenge following the collective disasters of the American bombing, the civil war, and the Khmer Rouge genocide. The magnitude of violence and human loss, the execution of artists and intellectuals, the erasure of individual and institutional cultural memory all caused great damage to Cambodian arts, culture, and society. Author Boreth Ly explores the “traces” of this haunting past in order to understand how Cambodians at home and in the diasporas deal with trauma on such a vast scale. Ly maintains that the production of visual culture by contemporary Cambodian artists and writers—photographers, filmmakers, court dancers, and poets—embodies traces of trauma, scars leaving an indelible mark on the body and the psyche. Her book considers artists of different generations and family experiences: a Cambodian-American woman whose father sent her as a baby to the United States to be adopted; the Cambodian-French filmmaker, Rithy Panh, himself a survivor of the Khmer Rouge, whose film *The Missing Picture* was nominated for an Oscar in 2014; a young Cambodian artist born in 1988—part of the “post-memory” generation. The works discussed include a variety of materials and remnants from the historical past: the broken pieces of a shattered clay pot, the scared landscape of bomb craters, the traditional symbolism of the checkered scarf called krama, as well as the absence of a visual archive. Boreth Ly's poignant book explores obdurate traces that are fragmented and partial, like the acts of remembering and forgetting. Her interdisciplinary approach, combining art history, visual studies, psychoanalysis, cultural studies, religion, and philosophy, is particularly attuned to the diverse body of material discussed, including photographs, video installations, performance art, poetry, and mixed media. By analyzing these works through the lens of trauma, she shows how expressions of a national trauma can contribute to healing and the reclamation of national identity.

Al Jazeera and the Global Media Landscape Apr 27 2020 This book analyzes how and why Al Jazeera English (AJE) became the channel of choice to understand the massive protests across the Arab world 2011. Aiming to explain the 'Al Jazeera moment,' it tracks the channel's bumpy road towards international recognition in a longitudinal, in-depth analysis of the channel's editorial profile and strategies. Studying AJE from its launch in mid-November 2006 to the 'Arab Spring', it explains and problematizes the channel's ambitious editorial agenda and strategies, examines the internal conflicts, practical challenges and minor breakthroughs in its formative years. The Al Jazeera-phenomenon has received massive attention, but it remains under-researched. The growth of transnational satellite television has transformed the global media landscape into a complex web of multi-vocal, multimedia and multi-directional flows. Based on a combination of policy-, production- and content analysis of comprehensive empirical data the book offers an innovative perspective on the theorization of global news contra-flows. By problematizing the distinctive characteristics of AJE, it examines the strategic motivation behind the channel and the ways in which its production processes and news profile are meant to be different from its Anglo-American competitors. These questions underscore a central nexus of the book: the changing relationship between transnational satellite news and power.

Flawed System/Flawed Self May 09 2021 Today 4.7 million Americans have been unemployed for more than six months. In France more than ten percent of the working population is without work. In Israel it's above seven percent. And in Greece and Spain, that number approaches thirty percent. Across the developed world, the experience of unemployment has become frighteningly common—and so are the seemingly endless tactics that job seekers employ in their quest for new work. Flawed System/Flawed Self delves beneath these staggering numbers to explore the world of job searching and unemployment across class and nation. Through in-depth interviews and observations at job-search support organizations, Ofer Sharone reveals how different labor-market institutions give rise to job-search games like Israel's résumé-based “spec games”—which are focused on presenting one’s skills to fit the job—and the “chemistry games” more common in the United States in which job seekers concentrate on presenting the person behind the résumé. By closely examining the specific day-to-day activities and strategies of searching for a job, Sharone develops a theory of the mechanisms that connect objective social structures and subjective experiences in this challenging environment and shows how these different structures can lead to very different experiences of unemployment.

Finding Your Power to Be Happy: Seven Practices to Bring Unconditional Happiness into Your Life May 21 2022 Learn to find the happiness that is natural to you, and enjoy better relationships, better health, more success and a longer life. The peculiar thing about us humans is, we spend a lot of time working to find people and things that will make us happy. In fact, we seem to spend the majority of our time doing this. However, there is no guarantee that any of this effort will work. There are lots of people who have hordes of people around them, and who have lots of things, but have been unable to make themselves happy. The truth is, happiness can be had with little effort. Have you ever been happy for no reason at all? Of course you have. Without anything changing in life, happiness just appears. We see it in young children all the time. In fact, we expect to see it in children. If you happen to ask a smiling child why he or she is so happy, at best the answer may be, “Because.” For an adult this may be an unsatisfying answer, but for the child it is the truth -- happiness exists “just because.” As we age we seem to lose touch with happiness-for-no-reason-at-all. We see a world where everyone is striving for stuff, striving for popularity, striving, striving, striving. The natural fount of happiness we once enjoyed disappears as we join them. However, that happiness is not gone. All that happened is we lost our connection to it. This book is about recovering that

connection. We all grow up believing that if we work hard, and if we are good people, we will enjoy good relationships with others, good health, success and a long life. Obviously this is not true. There are a lot of rich old people who are not happy. What we have, what we do, and the other circumstances of our lives do not provide authentic happiness. Instead, happiness comes from inside of us, and all by itself enables us to have secure relationships, good health, more success and longer lives. So, what is the secret of being happy? Being happy is a little like flipping a switch. When it's on you are happy and when it's off you are not. It's so easy. How else can you explain being happy for no reason. What you need to do is learn to turn it on, and keep it turned on. This book discusses seven practices that help you do that. There is a lot of wisdom available about how to be happy. Most of it is thousands of years old, but some is quite new. The seven practices we will look at incorporate this wisdom to help you learn how to turn on happiness in your life. This kind of happiness does not require changing anything in your life. All you have to do is learn to turn it on.

What helps employees to perform well and stay healthy under high levels of stress? What are the factors that distinguish those employees? What are the best ways to recover from a stressful day at work? How can employees proactively address stressors they encounter at work, and how can they move from "coping" to "thriving" in the workplace? Thriving Under Stress illuminates the ways stressful working conditions can produce positive outcomes when employees approach demands in the right way, focus on the meaning and significance of their work, and recover appropriately from stressful working conditions, both during the day and when at home. Some may be startled by their biting sincerity; others may be spellbound by their unbridled flights of fantasy. Don't buy this book if: 1. You don't have nerves of steel. 2. You expect to get pregnant in the next five minutes. 3. You've heard it all.

Exploring the Use and Impact of Travel Guidebooks Nov 03 2020 This volume provides the first comprehensive examination of travel guidebooks and their conceptualisation, use and impact. Guidebooks have been key tourism paraphernalia for almost two centuries and although researched in some areas, academic knowledge on guidebooks in tourism has not been expansively communicated. The uncritical, unreflective and largely pejorative approach to guidebooks in the public sphere, and to some degree also present in academia, is reassessed in this book. This challenges the current limited tourism research approaches to the topic, including the routinely held assumption that the internet has all but destroyed the printed guidebook. This book will be a useful resource for postgraduate students and researchers in tourism and tourism communications and consumption.

Dick Cole's War Mar 07 2021 With the 100th anniversary of his birth on September 7, 2015 Dick Cole has long stood in the powerful spotlight of fame that has followed him since his B-25 was launched from a Navy carrier and flown toward Japan just four months after the attack on Pearl Harbor. In recognition the tremendous boost Doolittle's Raid gave American morale, members of The Tokyo Doolittle Raiders were awarded the Congressional Gold Medal in May 2014. Doolittle's Raid was only the opening act of Cole's flying career during the war. When that mission was complete and all of the 16 aircraft had crash-landed in China, many of the survivors were assigned to combat units in Europe. Cole remained in India after their rescue and was assigned to Ferrying Command, flying the Hump of the Himalayas for a year in the world's worst weather, with inadequate aircraft, few aids to navigation, and inaccurate maps. More than 600 aircraft with their crews were lost during this monumental effort to keep China in the war, but Cole survived and rotated home in 1943. He was home just a few months when he was recruited for the First Air Commandos and he returned to India to participate in Project 9, the aerial invasion of Burma.
