This new offering from Cherry Lake Publishing, was developed to educate young readers on how to use both print and electronic encyclopedias. Producing Women examines the ways femininity is produced through new media. Michele White considers how

women are constructed, produce themselves as subjects, form vital production cultures on sites like Etsy, and deploy technological processes to reshape their identities and digital characteristics. She studies the means through which women market traditional female roles, are viewed, and produce and restructure their gendered, raced, eroticized, and sexual identities. Incorporating a range of examples across numerous forms of media—including trash the dress wedding photography, Internet how-to instructions about zombie walk brides, nail polish blogging, DIY crafting, and reborn doll production—Producing Women elucidates women's production cultures online, and the ways that individuals can critically study and engage with these practices. Managing biosecurity is everybody's business. The book's multi-site, multi-sectoral research contributes to an holistic, evidence-based

strategy for managing plant biosecurity in complex contexts. The intent is to provide a starting point for all stakeholders in the biosecurity endeavor – policy personnel at all levels of governance, planners and regional developers, non-government organizations, community groups and individuals – to plan localized strategies that ‘fit’ national needs and constraints and the way people live their lives. In putting forward a ‘strategy’, we draw on many disciplines and cultural perspectives on a problem that is fundamentally a multidisciplinary and global issue. At the same time, the contributing researchers remain aware that such a strategy is always subject to local contextual factors and influences, indigenous and local knowledge and culture, and is regarded as a tool for planning, always subject to change.

The Natural Law of the Universe is be who you were born to be, take what you need and leave the rest. I got sick from the sulphites in lemon juice then I started getting headaches from something. I think it was aspartame in pop. I got Dr. Hulda Clark's book Cure for all Cancers and when I read it, I thought she was obsessed with being pure away from all the chemicals in industrial products but she did what nobody else has done. She catalogs almost every product in existence and tells you what's wrong with it. The modern capitalist industries will not tell you if their products contain materials that are toxic to your health. You have to learn these things for yourself then decide how dangerous all that stuff is and if it's a risk to your longevity and quality of life. Lots of people are born disabled due to genetic reasons or as the result of pregnancy complications. People get injured or acquire debilitating diseases at some point in life. I've lived with both, a disabled relative and serious injuries of my own. The thing is that the world goes on. It doesn't slow down or stop just because someone is disabled. We can do so much politically and the rest we have to do on our own to

fit into the world somehow in a useful, productive way to get the money we want to buy the things that will help us survive and enjoy our lives more. The best thing I ever saw about disabilities was the 1940s movie called Shaggy Bush which was a movie about a family going through ups and downs. There was a bit in there where the mother said her daughter's disability didn't mean she was doomed. It just meant that she would still do what she felt in her spirit with her life with this extra nuisance to deal with.

Quicklets: Learn More. Read Less. Published in 1989, best-selling *Liar's Poker* details author Michael Lewis's time in the London office of Salomon Brothers in the mid-1980's. Written after he left the

firm in 1988, the book tells the story of 1980's Wall Street in a wickedly funny manner, featuring some of the most interesting characters to walk across the pages of non-fiction. Along with Tom Wolfe's *Bonfire of the Vanities*, it is generally considered to be one of the defining books of the era. The name is taken from liar's poker, a gambling game popular with Wall Street traders. Though *Liar's Poker* has not yet been made into a film, Lewis is currently in discussions with Warner Bros. about a film adaptation.

**BOOK EXCERPT FROM CHAPTER 3 OF THE QUICKLET ON LIAR'S POKER**

But all that began to change in late 1979. Michael compares making money on Wall Street to eating the stuffing out of a turkey; first somebody must stuff the turkey. In 1979, the bond turkey started getting stuffed. Two parties were responsible. The first was Fed chairman Paul Volcker, who on October 6, 1979, announced that interest rates would no longer be fixed. Money supply would be fixed, and interest rates would float. In practice, this meant that interest rates would swing wildly. And since bond prices moved inversely to interest rates, bond prices would swing wildly as well. In one move, the bond market was changed from a sleepy backwater for a safe investments into a casino. The second was the governments, corporations, and consumers of the United States.

Specifically, their desire to borrow money. The rate of borrowing increased during the 1980's faster than it ever had before; the indebtedness of all three groups totaled \$323 billion in 1977. By 1985 it was \$7 trillion. ...to be continued! Quicklets: Learn More. Read Less. A good mind knows the right answers...but a great mind knows the right questions. When the *Best Technology Writing* series was inaugurated in 2005, these technologies did not exist. Now they define our 21st-century lives. As Julian Dibbell writes in his introduction to *The Best Technology Writing 2010*, "The digital is us. Yet for that reason, it is also something more, a lightning rod for our feelings about technology in general." Whether it is Sam Anderson's giddy but troubled defense of online distractions, David Carr's full-throated elegy to the dying world of pre-digital publishing, Steven Johnson's warm appreciation of Twitter's bite-size contributions to collective human

intelligence, or Evan Ratliff's fascinating month-long quest to disappear without a digital trace, many of the essays gathered here register our intense and complicated fascination with digital media. But as Dibbell notes, these essays also remind us that some of the most disruptive and fascinating technologies continue to come from beyond the digital world. Jill Lepore's writing on the politics of breast-feeding gadgetry, Stephen Silberman's investigation of the placebo effect in pharmaceutical testing, Burkhard Bilger reporting on efforts to build a better cook stove for the developing world, and Tad Friend's profile of electric-car developer Elon Musk's efforts to head off environmental catastrophe all invite us to reflect on how many aspects of human experience remain fundamentally unchanged by digital technology. Packed with marvelous essays on technologies old and new, "The Best Technology Writing 2010" is an outstanding addition to this "fantastic" (Cory Doctorow), "fascinating" (Chris Anderson) series. "The Best Technology Writing 2010" includes essays written by: Sam Anderson Burkhard Bilger Joshua Bearman Mark Bowden David Carr Douglas Fox Tad Friend Ben Greenman Vanessa Grigoriadis James Harkin Adam Higginbotham Alex Hutchinson Steven Johnson Kevin Kelly Jill Lepore Alexis Madrigal Javier Marias
