Provides a fully revised Eleventh Edition of the definitive reference to swine health and disease Diseases of Swine has been the definitive reference on swine health and disease for over 60 years. This new edition has been completely revised to include the latest information, developments, and research in the field. Now with full color images throughout, this comprehensive and authoritative resource has been redesigned for improved consistency and readability, with a reorganized format for more intuitive access to information. Diseases of Swine covers a wide

range of essential topics on swine production, health, and management, with contributions from more than 100 of the foremost international experts in the field. This revised edition makes the information easy to find and includes expanded information on welfare and behavior. A key reference for anyone involved in the swine industry, Diseases of Swine, Eleventh Edition: Presents a thorough revision to the gold-standard reference on pig health and disease Features full color images throughout the book Includes information on the most current advances in the field Provides comprehensive information on swine welfare and behavior Offers a reorganized format to make the information more accessible Written for veterinarians, academicians, students, and individuals and agencies responsible for swine health and public health, Diseases of Swine, Eleventh Edition is an essential guide to swine health. "The 11th edition of Diseases of Swine continues to serve as the gold-standard resource for anything and everything related to swine herd health...this edition does an outstanding job of keeping up with the advanced diagnostic technologies and the latest research on new or emerging diseases and syndromes...there is no other informational resource that comes close to providing the depth or quality of information on the topic of swine diseases as does this book"

Collection of the monthly climatological reports of the United States by state or region with monthly and annual national summaries. This book provides a technical and specialised discussion of contemporary and emerging issues in foreign exchange and financial markets by addressing the issues of risk management and theory and hypothesis development, which have general implications for finance theory and foreign exchange market management. It offers an in-depth, comprehensive analysis of the issues concerning the volatility of exchange rates. The book has three main objectives. First, it applies the integrated study of exchange rate volatility in terms of depth and breadth. Second, it applies the integrated study of exchange rate volatility in Malaysia, as a case study of a developing country. Malaysia had imposed capital control measures in the past and has now liberalised its exchange rate market and will continue to liberalise it further in the long run. Hence, the need to understand exchange rate volatility measurement and management will be even more important in the future. Third, the book highlights new conditional volatility models for a developing country, such as Malaysia, and develops advanced econometric models which have produced results for sound risk management strategies and for achieving risk management in the financial market and the economy. Additionally, the authors recommend risk management themes which may be of relevance to other developing countries. This work can be used as a reference book by fund managers, financial market analysts,

researchers, academics, practitioners, policy makers and postgraduate students in the areas of finance, accounting, business and financial economics. It can also be a supplementary text for Ph.D. and Masters' students in these areas. This encyclopedia travels around the world and across the centuries to uncover an often unexpected richness of meaning in some of the major sacred festivals of the world's religions, the hallowed calendars of ancient civilization and the seasonal celebrations of tribal cultures. Collection of the monthly climatological reports of the United States by state or region, with monthly and annual national summaries. The two-volume set, CCIS 243 and CCIS 244, constitutes the refereed proceedings of the Second International Conference on Information Computing and Applications, ICICA 2010, held in Qinhuangdao, China, in October 2011. The 191 papers presented in both volumes were carefully reviewed and selected from numerous submissions. They are organized in topical sections on computational statistics, social networking and computing, evolutionary computing and applications, information education and application, internet and web computing, scientific and engineering computing, system simulation computing, bio-inspired and DNA computing, internet and Web computing, multimedia networking and computing, parallel and distributed computing. This book constitutes the refereed proceedings of the Second International Conference on Information Computing and Applications, ICICA 2010, held in Qinhuangdao, China, in October 2011. The 97 papers presented were carefully reviewed and selected from numerous submissions. They are organized in topical sections on computational economics and finance, computational statistics, mobile computing and applications, social networking and computing, intelligent computing and applications, internet and Web computing, parallel and distributed computing, and system simulation and computing. About the publication This Compendium of documents relating to regional and sub-regional peace and security in Africa is the second edition to the 2006 Compendium of key documents related to peace and security in Africa (edited by Dr Monica Juma). It is both an updated and expanded attempt at consolidating the vast legal instruments broadly relating to peace and security on the African continent. More specifically, the Compendium aims to consolidate, both on the regional and sub-regional level, treaties and decisions of regional organisations pertaining to conflict prevention, management and resolution in the African regional and sub-regional context. It ultimately aims to serve as a useful research guide to those involved with matters of peace and security in Africa. Documents and legal instruments included in this Compendium focus on the Organisation of African Unity, the African Union, and its eight Regional Economic Communities: the Arab Maghreb Union

(AMU), the Common Market for Eastern and Southern Africa (COMESA), the Community of Sahel-Saharan States (CEN-SAD), the East African Community (EAC), the Economic Community of Central African States (ECCAS), the Economic Community of West African States (ECOWAS), the Intergovernmental Authority on Development (IGAD), and the Southern African Development Community (SADC). This edition also includes additional documents from sub-regional organisations, including documents from the Great Lakes Region and Horn of Africa Conference on the Proliferation of Small Arms and Light Weapons, the Gulf of Guinea Commission, the Central African Economic and Monetary Community, the Eastern Africa Standby Force, the G5 Sahel, the Indian Ocean Commission, and the Mano River Union. Additionally, each chapter outlines the organisation in question, its principal institutions relating to peace and security, relevant documents and legal instruments, and listed topical decisions, declarations and communiqués by that organisation and its institutions. It also briefly puts forward the details of any military interventions or peacekeeping missions undertaken by each organisation. Finally, the Compendium's indexes include a list of peace and ceasefire agreements (listed by country), chart of ratifications, a list of useful websites and a selected bibliography. This book sheds light on how global warming has caused the ongoing environmental disaster in the Arctic, namely its melting. It offers insights on the issues that have grave implications for energy security and geopolitics in the arctic. Collection of the monthly climatological reports of the United States by state or region with monthly and annual National summaries. This book constitutes the refereed proceedings of the 16th International Conference on Secure IT Systems, NordSec 2011, held in Tallinn, Estonia, October 26-28, 2011. The 16 revised papers presented together with 2 invited talks were carefully reviewed and selected from 51 submissions. The papers are organized in topical sections on applied cryptography, commercial security policies and their enforcement, communication and network security, security modeling and metrics, economics, law and social aspects of security, and software security and malware.

Wolfgang Herrndorf begon direct na de fatale diagnose van een ongeneeslijke hersentumor een digitaal dagboek, om zijn vrienden op de hoogte te houden en zijn gedachten onder controle te krijgen. Hij nam een opvallend besluit: zijn resterende tijd te vullen met werken en een exit-strategie bepalen. Hij versnelde zijn schrijfproces met een ongelooflijke discipline. Met de tumor in zijn hoofd schreef hij o.a. Tsjik (meer dan 1,7 miljoen exemplaren verkocht) en een jaar later de roman Sand. Na het verschijnen van Tsjik maakte Herrndorf zijn digitale dagboek openbaar. Het groeide uit tot een van de meest gelezen weblogs van Duitsland.

Leven met het pistool op tafel is een met bewonderenswaardige precisie geschreven onderzoek van een openhartige auteur, met zichzelf als onderzoeksobject. Het pistool op zijn bureau geeft rust: als zijn epileptische aanvallen of desoriëntatie te pijnlijk voor Herrndorf en zijn vrienden worden, is het voor hem tijd te gaan. Toen hij ten slotte ook zijn taal aan het verliezen was, beëindigde hij op 26 augustus 2013, op achtenveertigjarige leeftijd, zijn leven. Het is evident waar alle lof voor Herrndorf vandaan komt: hij schrijft zonder medelijden op te willen wekken, en vaak zelfs met verrassende humor. Zijn aantekeningen gaan over het omgaan met tijd, efficiëntie en arbeid, het schrijven (met boeiende inzichten over Tsjik), zijn liefde voor de natuur en geliefde kunstenaars (waaronder Jacob van Ruisdael), zijn vrienden, zijn angsten en verlangens. Zijn motto: onverbiddelijk naar de waarheid streven, de directe confrontatie met de feiten nooit uit de weg gaan en bovenal je optimisme nooit verliezen.

Bridge Maintenance, Safety, Management, Resilience and Sustainability contains the lectures and papers presented at The Sixth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2012), held in Stresa, Lake Maggiore, Italy, 8-12 July, 2012. This volume consists of a book of extended abstracts (800 pp) and a DVD (4057 pp) co

Christopher Warnock's *Mansions of the Moon* is the definitive source for the Arabic and Western lunar Mansions and their use in traditional electional astrology and astrological magic. *Mansions of the Moon* provides an introduction to this fascinating and hidden system of traditional astrology. With beautiful black and white illustrations of each of the images of the 28 Mansions from Picatrix by Nigel Jackson, the talented mage and artist, the *Mansions of the Moon* is an ideal source for talismanic magic. Warnock provides a complete history and introduction to the Mansions, practical instructions for their use and extensive appendices from traditional sources on the Mansions. This book examines national and international exchange of information concerning corporate income tax and VAT. The first part gives an overview of the national rules governing the acquisition of data with special attention to the examination fee in respect of public services and institutions (including prosecutors and courts). The second part deals with international cooperation based on bilateral and multilateral treaties as well as legal instruments related to exchange of information in the European Union. The book also considers the protection of taxpayers' rights in case of exchange of information. Artisanal mining is commonly associated with violent conflict, rampant corruption and desperate poverty. Yet millions of people across Sub Sahara Africa depend on it. Many of them are living in eastern Democratic Republic of Congo (DRC), home to important mineral reserves, but also to a plethora of armed groups and massive

human rights violations. *African Artisanal Mining from the Inside Out* provides a rich and in-depth analysis of the Congolese gold sector. Instead of portraying miners and traders as passive victims of economic forces, regional conflicts or disheartening national policies, it focuses on how they gain access to and benefit from gold. It shows a professional artisanal mining sector governed by a set of specific norms, offering ample opportunities for flexible employment and local livelihood support and being well-connected to the local economy and society. It argues for the viability of artisanal gold mining in the context of weak African states and in the transition towards a post-conflict and more industrialized economy. This book will be of great interest to researchers and postgraduates studying natural resources and development as well as those in development studies, African studies, sociology, political economy, political ecology, legal pluralism, and history.
