[Teacher Education in Times of Change](#) Apr 05 2021 Why is teacher education policy significant - politically, sociologically and educationally? While the importance of practice in teacher education has long been recognised, the significance of policy has only been fully appreciated more recently. Teacher education in times of change offers a critical examination of teacher education policy in the UK and Ireland over the past three decades, since the first intervention of government in the curriculum. Written by a research group from five countries, it makes international comparisons, and covers broader developments in professional learning, to place these key issues and lessons in a wider context.

[Building the Old Time Religion](#) Dec 01 2020 During the Progressive Era, a period of unprecedented ingenuity, women evangelists built the old time religion with brick and mortar, uniforms and automobiles, fresh converts and devoted protégés. Across America, entrepreneurial women founded churches, denominations, religious training schools, rescue homes, rescue missions, and evangelistic organizations. Until now, these intrepid women have gone largely unnoticed, though their

collective yet unchoreographed decision to build institutions in the service of evangelism marked a seismic shift in American Christianity. In this ground-breaking study, Priscilla Pope-Levison dusts off the unpublished letters, diaries, sermons, and yearbooks of these pioneers to share their personal tribulations and public achievements. The effect is staggering. With an uncanny eye for essential details and a knack for historical nuance, Pope-Levison breathes life into not just one or two of these women—but two dozen. The evangelistic empire of Aimee Semple McPherson represents the pinnacle of this shift from itinerancy to institution building. Her name remains legendary. Yet she built her institutions on the foundation of the work of women evangelists who preceded her. Their stories—untold until now—reveal the cunning and strength of women who forged a path for every generation, including our own, to follow. Priscilla Pope-Levison is Professor of Theology and Assistant Director of Women's Studies at Seattle Pacific University. Her previous books include *Sex, Gender, and Christianity*; *Turn the Pulpit Loose: Two Centuries of American Women Evangelists*; *Return to Babel: Global Perspectives on the Bible*; *Jesus in Global Contexts*; and *Evangelization in a Liberation Perspective*.

**De literaire kring** Dec 13 2021 De dertigjarige Teresa Pellikaan woont weer in het dorp waar ze is opgegroeid. Haar rijke echtgenoot is er lid van de literaire kring, ooit opgericht door Teresa's vader. Op een dag in het voorjaar hoort Teresa dat haar vroegere klasgenoot Ruth Ackermann een internationale bestseller heeft geschreven. Het lijkt haar een mooi idee als de literaire kring in het dorp dat beroemde boek gaat lezen, maar iedereen reageert opmerkelijk afwijzend. Langzamerhand krijgt Teresa te horen wat er in het verleden is gebeurd rond de familie van de wereldberoemde schrijfster. Met *De literaire kring* schreef Maxim Februari de grote Nederlandse roman over de weldenkende klasse. Schrijver, jurist en filosoof Maxim Februari debuteerde in 1989 met de roman *De zonen van het uitzicht* en ontpopte zich in de bijna dertig jaar die volgden tot een van de scherpzinnigste en origineelste denkers van ons taalgebied. In 2007 publiceerde hij de grote roman *De literaire kring*, die nationaal en internationaal bejubeld werd. Het boek won de Annie Romein-Verschoorprijs en behaalde de shortlist van de Libris Literatuurprijs en de Gouden Uil Literatuurprijs en de longlist van de International Impac Dublin Literary Award. In 2008 ontving Februari de Frans Kellendonkprijs voor zijn gehele oeuvre.

*A History of the University College of Fort Hare, South Africa, the 1950s* Feb 27 2023 This book examines how staff and students opposed the legislation to place the college under government control and reduce its staff to civil servants. The affairs of the college are discussed against the background of rapidly changing conditions in South Africa, with campus disturbances and protests sometimes linked to the wider application of apartheid."--BOOK JACKET.

*Course of Practical Chemistry, as Adopted at University College, Toronto (Classic Reprint)* Feb 21 2020 Excerpt from *Course of Practical Chemistry, as Adopted at University College, Toronto* The following pages contain an outline of the course of practical chemistry adopted by the writer in University College, and will be found to correspond very closely with a similar work by Dr. Odling; differing however in some respects, to meet the requirements of Canada's students, and being in accordance with the plan of instruction, which after many years' experience the writer has found best adapted to the wants of his pupils. Unnecessary matter has been as far as possible excluded, only the most reliable and easily applicable tests being mentioned, and as the work makes no claim to originality, it has not been thought necessary to refer to authorities, except in a few instances. **The Johns Hopkins University School of Medicine Curriculum for the Twenty-first Century** Sep 29 2020 "Our basic philosophy of medical education must be directed not toward creating a neurosurgeon, a family practitioner, a cardiologist,

or a general pediatrician but toward creating an undifferentiated 'stem cell' physician who is so well prepared that he or she is fully capable of taking any career path after medical school. Every indication is that our goal is being met. The new curriculum is preparing students for the demands and responsibilities of a new era of medicine, science, and medical arts." -- from the Foreword, by Michael M. E. Johns, M.D. The curriculum taught in many U.S. medical schools today has been altered little since 1910. Now, spurred in part by the recent sweeping changes in health care delivery, medical schools are re-evaluating their curricula. The goal is to develop a program of medical education that not only reflects the latest scientific advances but also prepares physicians in the fields and specialties society now needs. This book provides an extensive description of the process and outcome of developing a completely new curriculum at the Johns Hopkins University School of Medicine. The book is organized around the subjects and courses taught: basic sciences, physician and society, medical informatics, and clinical medicine. Chapters also consider evaluation and reform of the curriculum. The contributors, Johns Hopkins faculty members who participated in developing the components of the curriculum, discuss differences between the old and new courses and programs, reasons for the changes, and the process used to plan and implement them. Throughout, the material is presented in a way that permits easy generalization and adaptation to other medical schools. Contributors: Catherine D. De Angelis, M.D. Diane M. Becker, Sc.D. Gert H.
