Why do knitters knit? Maybe we have a simple desire to make our own clothing and accessories. Maybe it's a way to express ourselves. The yarns we choose, the color palettes we are drawn to, the modifications we make ... this is how we play and create. Using skill and creativity, craftsmanship and ideas, a knitter can make almost anything. We create clothing and accessories that can't be bought or found anywhere else. We are conscious beings, not machines. We make tiny mistakes and sometimes our tension isn't perfect, but in the end we create something that is uniquely ours. And that's such a beautiful thing. A ball of yarn can be transformed into just about anything in the hands of a knitter, and in this book I hope to show you how your knitted fabric can become your canvas. True to my rebel heart, sometimes I feel the need to let go, break the rules and embrace the unexpected. To express myself freely. I cannot explain to you the joy I felt creating the pieces in this collection. Spreading them out on newspapers and flinging paint and bleach in an intentional, yet very careless, arbitrary way. I can't wait to share this with you. Many knits in this book were altered in some way after the knitting process was complete and some were left untouched. But this book is written for every knitter. The dyeing, bleaching and painting techniques are optional. Each piece in this collection can be knitted and left as-is, or you can take it a step further and used mixed media to create something brand new. I will show you how with techniques explained at the end of this book. And never fear - you will be using swatches to test the different outcomes of your artistic experiments before you decide to dip-dye or hand-paint your knits. I dare you to try something new. I don't believe in mistakes. Trust your creativity and let your knits become what they want to be. The handbook is composed of chapters by authors who discuss the important features of particular types of toys, provide information related to the developmental importance of this type of toy, discuss social and cultural issues engendered by play with such toys, and review the available research on the characteristics and potential impact on children's developmental progress of toys of that type. Both traditional toys and technological toys are discussed. The handbook is expected to serve both as a reference for educators, parents, toy designers, and other interested readers, and as a catalyst for further research and ongoing toy development. Its purpose includes helping readers to gain knowledge that enables them to more fully appreciate the value of children's toy play, find out more about the favorite toys they had in childhood and relive those satisfying play experiences, and learn how to foster the learning, physical development, and social-emotional growth that comes from such toy play. Presents the basic techniques of knitting and guides the beginner in creating an original sweater using simple knits and purls and adding stripes, textures, ribbing, and ruffles. Learn to knit in 20 easy stages with this step-by-step guide to stitches and techniques If you would like to start knitting but don't have anyone to show you how, or if you know the basics of knitting but would like to improve and learn the more complex skills of shaping, lace patterns and colorwork, then 'Knitting Basics' is for you. Starting at the very beginning with casting on, knit stitch and binding off, the 20 workshops take you step by step through different stitches and techniques, with color artworks to show you how everything is done. At the end of every workshop there is a project to make which is designed to put what you have learned so far into practice—the best way of making sure you don't forget what you've learned. As you progress through the workshops, you will also learn how to read patterns, how to join pieces, and how to knit in the round. The projects include a table runner made up of squares knitted in knit stitch, a child's jumper with intarsia design, a messenger bag with cable patterns, and a textured throw with bobbles and fringing. There is an introductory section on tools and materials, and there's also a handy stitch reference guide in case you just want to refresh your memory of a particular stitch. It's beginning to look a lot like Christmas for the knitters of Fort Connor, Colorado, who are furiously working on their holiday projects. And it's not a stitch too soon, because some unfortunate resident will be feeling a deadly chill instead of holiday cheer... This Yuletide, Kelly Flynn and friends are helping the town's librarian, Juliet, teach children how to knit. Juliet has fallen in love—but just as she finds happiness, death finds her, facedown in her Christmas cape. Suspicion falls on a newcomer, a widow with a puzzling past, who—some believe—was sweet on Juliet's boyfriend. But Kelly and her knitting crew aren't convinced. It's up to them to find a killer—before someone else gets fleeced. “A perfect read...when snuggling down after the turkey dinner has been devoured.” –Mystery Books News The World of Knitting Right at Your Fingertips More than a how-to book, A Passion for Knitting goes beyond teaching the craft and introduces readers to the culture of knitting. Andrew has had a lifetime of working with wood, initially making spinning wheels, furniture and joinery, then including various metals, acrylic and other media into his kaleidoscopes. While living in India for two years and seeing workers struggling to perform some quite fundamental tasks in very simple workshops, he thought it would be a good idea to write a book that passed on all the information, ideas and shortcuts he had learnt and developed over the years. Specifically, that it is possible to achieve, in a very basic workshop, things that are usually imagined to need expensive equipment, but that can be done easily and cheaply by thinking a little outside the square. His aim is to make workshop time more enjoyable, productive, and of course, safe. The book is not intended to be overly technical, but instead presents the reader with a host of simple advice and techniques to overcome production problems in a Home Workshop. Many of the ideas are just as relevant when working with wood or metal, and the reader is encouraged to build on and develop the hints to fulfil their own individual goals. 'Knitting with Wire' is written in an easy to understand and almost conversational style, supported by a large number of photos and diagrams to illustrate the various points and practices. From advice and tips on marking out, sharpening, drilling and grinding, using saws, planers, shapers and wood and engineer's lathes, 'Knitting with Wire' also has sections on a wide variety of fields that the hobbyist may meet; threading, welding, making and tempering tools and working with acrylic. Important issues such as electric motors, compressed air, dust extraction, laminating, gluing and finishing wood, powder coating metals, workshop layout and above all workshop safety are also discussed. Of course the key to competence in any endeavour is practice, but 'Knitting with Wire' will help the amateur by suggesting new possibilities to achieving a professional looking result. The Appendix has a helpful range of charts and specifications, and the book's large page size makes this an ideal volume to use as a quick reference guide, right there in the workshop.
