**Handbook of Governance in
Small States** Feb 27 2021 This
volume covers a wide spectrum
of governance issues relating
to small states in a global
context. While different
definitions of governance are

given in the chapters, most
authors associate governance
with the setting and
implementation of policies
aimed at managing a country
or territory, and with the
related institutional structures
and interventions by political
actors. Generally, good
governance is associated with
concepts such as policy
effectiveness, accountability,
transparency, control of
corruption, encouragement of
citizens' voice and gender
equality—factors which are, in
turn, linked with democracy.
What emerges from the book is
that the societies of small
states are being re-shaped by
various forces outside their
control, including the

globalization process and
climate change, rendering their
governance ever more
complex. These problems are
not solely faced by small states,
but small country size tends to
lead to a higher degree of
exposure to external factors.
The chapters are grouped into
four sections broadly covering
political, environmental, social
and economic governance.
Governance is influenced by
many, often intertwined,
factors; the division of the book
into four parts therefore does
not detract from the fact that
governance is multifaceted,
and such division was based on
the primary focus of each
particular study and its main
disciplinary background. The

expert authors have, moreover, used a variety of approaches in the studies, the subject of small states being well suited to scholarly work from different disciplines using qualitative, quantitative and mixed approaches to arrive at useful conclusions.

Burlington Brewing: A History of Craft Beer in the Queen City Jun 14 2022 Burlington has welcomed local farms, breweries and distilleries with open arms. The Queen City fosters a unique culture around beer and farm-to-table cuisine. Daniel Standiford established the city's first brewery in 1880. Prohibition ushered in a dry era that remained for more than a century until Greg and Nancy Noonan fought the law and established Vermont Pub & Brewery in the late 1980s. Since then, breweries have

popped up, from nationally recognized Magic Hat down to the city's first blendery, House of Fermentology. Authors Adam Krakowski and Jeff S. Baker II explore Burlington's sudsy history from early newspaper clippings to modern-day tastemakers, along with some delicious recipes. *Beer and Racism* Sep 24 2020 Beer in the United States has always been bound up with race, racism, and the construction of white institutions and identities. Given the very quick rise of craft beer, as well as the myopic scholarly focus on economic and historical trends in the field, there is an urgent need to take stock of the

intersectional inequalities that such realities gloss over. This unique book carves a much-needed critical and interdisciplinary path to examine and understand the racial dynamics in the craft beer industry and the popular consumption of beer.

A Luta Continua Mar 19 2020

What has media freedom entailed over the couple of centuries and successive governments of the geopolitical region that became South Africa since it was colonised by Westerners? And why can media freedom be described as both pillar and cornerstone of a democracy? It's simple, as in the words of Nelson Mandela, first state president of a

democratic South Africa: Press freedom is the "lifeblood of democracy". This book tells the tale of the various states of press freedom, or unfreedom, from colonial times to today – from a British governor called a dictator and a despot, through apartheid's "pigmentocracy", or "sjambokracry", where the rule of law "has been replaced by the rule of the whip", up to the dawn of liberation, with media freedom entrenched in Article 16 of South Africa's Bill of Rights. And why should all of this concern you? Because media freedom is not about the freedom of the media. It is about your freedom. As was formulated by an editor under apartheid: "If we don't have a

public sympathetic to a free press, not only will we not have a free press, we won't have a democracy either." Or, in the words of former Sowetan editor and SANEF chair, Mpumelelo Mhkabela: "Media freedom has nothing to do with the media, but with the freedom of citizens." And that is why you should know that a free media is the only guarantee for your freedom. As we have seen, both under apartheid and also under a democratic dispensation, it is a matter of a *luta continua*. The struggle continues. But you, the public, are the guardian of those that guard democracy. Help ensure the rights of a free media, and thereby your democratic rights and a

democratic South Africa.

Digital Ethics Jan 17 2020

Digital Ethics delves into the shifting legal and ethical landscape in digital spaces and explores productive approaches for theorizing, understanding, and navigating through difficult ethical issues online. Contributions from leading scholars address how changing technologies and media over the last decade have both created new ethical quandaries and reinforced old ones in rhetoric and writing studies. Through discussions of

rhetorical theory, case studies and examples, research methods and methodologies, and pedagogical approaches and practical applications, this collection will further digital rhetoric scholars' inquiry into digital ethics and writing instructors' approaches to teaching ethics in the current technological moment. A key contribution to the literature on ethical practices in digital spaces, this book will be of interest to researchers and teachers in the fields of digital rhetoric, composition, and writing studies.

Fate of Free, "Masked" and Conjugated/Modified forms of Mycotoxins Jan 09 2022

International trade is highly

affected by mycotoxin contaminations, which result in an annual 5% to 10% loss of global crop production. In the last decade, the mycotoxin scenario has been complicated by the progressive understanding—alongside emerging mycotoxins—of the parallel presence of modified (masked and conjugated) forms, in addition to the previously free known ones. The present Toxins Special Issue presents original research papers and reviews that deal with the fates of all these forms of mycotoxins with respect to aspects that cover traditional and industrial food processing, yearly grain campaign peculiar conditions

and management, novel analytical solutions, consumer exposure, and biomarker-assessment directions. It gives a taste of an exciting scientific field that has several implications for our daily life because (i) it covers our diet practically and from every point of view, (ii) it intersects with our culinary uses and customs, but also industrial production processes, and (iii) it involves a careful evaluation of costs and benefits and a constant and continuous improvement of mycotoxin mitigation strategies.

Online Learning Analytics

Apr 19 2020 "In our increasingly digitally enabled education world, analytics used

ethically, strategically, and with care holds the potential to help more and more diverse students be more successful on higher education journeys than ever before. Jay Liebowitz and a cadre of the fields best 'good trouble' makers in this space help shine a light on the possibilities, potential challenges, and the power of learning together in this work."

—Mark David Milliron, Ph.D., Senior Vice President and Executive Dean of the Teachers College, Western Governors University Due to the COVID-19 pandemic and its aftereffects, we have begun to enter the "new normal" of education. Instead of online learning being an "added

feature" of K-12 schools and universities worldwide, it will be incorporated as an essential feature in education. There are many questions and concerns from parents, students, teachers, professors, administrators, staff, accrediting bodies, and others regarding the quality of virtual learning and its impact on student learning outcomes. Online Learning Analytics is conceived on trying to answer the questions of those who may be skeptical about online learning. Through better understanding and applying learning analytics, we can assess how successful learning and student/faculty engagement, as examples, can

contribute towards producing the educational outcomes needed to advance student learning for future generations. Learning analytics has proven to be successful in many areas, such as the impact of using learning analytics in asynchronous online discussions in higher education. To prepare for a future where online learning plays a major role, this book examines: Data insights for improving curriculum design, teaching practice, and learning Scaling up learning analytics in an evidence-informed way The role of trust in online learning. Online learning faces very real philosophical and operational challenges. This book

addresses areas of concern about the future of education and learning. It also energizes the field of learning analytics by presenting research on a range of topics that is broad and recognizes the humanness and depth of educating and learning.

Drinking Up the Revolution Jul 03 2021 James Wilt exposes the links between the global alcohol industry and capitalism. In *Drinking Up the Revolution*, James Wilt shows us why alcohol policy should be at the heart of any socialist movement. Many people are drinking more now than ever before, as already massive multinationals are consolidating and new online

delivery services are booming in an increasingly deregulated market. At the same time, public health experts are sounding the alarm about the catastrophic health and social impacts of rising alcohol use, with over three million people dying ever year due to alcohol-related harms. Exposing the links between the alcohol industry and capitalism, colonialism and environmental destruction, Wilt demonstrates the failure of both prohibition and deregulation, and instead focuses on those who profit from alcohol's sale and downplay its impacts: producers, retailers, and governments. Rejecting both the alcohol industry's

moralizing against individual “problem drinkers” and the sober politics of “straight-edge” and wellness lifestyle trends, *Drinking Up the Revolution* is not another call for prohibition or more governmental control, but is instead a cry to take back alcohol for the people, and make it safe and enjoyable for all those who want to use it.

The Ethics of Engagement

Feb 16 2020 How can an “ethics of listening” guide the media to contribute to the deepening of democracy in Africa? In Africa, the media plays a significant role in conflict management and resolution. Which conflicts the media report, which are

ignored, and how conflicts are represented can have a profound impact on the outcomes. While the media can in some cases ensure the stability of African democracy, critics have pointed out that in other cases, the media actually increases tensions in areas of conflict. The media tends to privilege only elite voices, offering superficial coverage of marginalized groups in a way that increases polarization. In *The Ethics of Engagement*, Herman Wasserman explores the ethics of the media in conflicts that arise during transitions to democracy in Africa. He examines the roles, responsibilities, and obligations of media in contexts of high

socioeconomic inequality. In doing so, he looks at ethnic and racial polarization in the histories of colonialism, post-colonial authoritarianism, and hybrid regimes. Taking a critical view of the normative guidelines and professional identities of journalism inherited from contexts outside of Africa, he argues that a more reciprocal and collaborative approach is needed. He develops a new ethics of engagement that would require the media to facilitate the resolution of conflicts across differences of ethnicity, citizenship, and class. A central point of this theory is the development of an “ethics of listening” which would enable

the media to conceive of their role as facilitators in democratic deliberation and community-building.

Wasserman applies his ethics of listening to case studies across the African continent.

He finds that by following this new model of conduct, the media may actually deepen democracy and help de-escalate conflict. This original study provides a useful framework for reimagining the media's role in transitional democracies in Africa--and across the globe.

Apps Mar 11 2022 Since the rise of the smartphone, apps have become entrenched in billions of users' daily lives. Accessible across phones and

tablets, watches and wearables, connected cars, sensors, and cities, they are an inescapable feature of our current culture. In this book, Gerard Goggin provides a comprehensive and authoritative guide to the development of apps as a digital media technology. Covering the technological, social, cultural, and policy dynamics of apps, Goggin ultimately considers what a post-app world might look like. He argues that apps represent a pivotal moment in the development of digital media, acting as a hinge between the visions and realities of the "mobile," "cyber," and "online" societies envisaged since the

late 1980s and the imaginaries and materialities of the digital societies that emerged from 2010. Apps offer frames, construct tools, and constitute "small worlds" for users to reorient themselves in digital media settings. This fascinating book will reframe the conversation about the software that underwrites our digital worlds. It is essential reading for students and scholars of media and communication, as well as for anyone interested in this ubiquitous technology.

Darkened Enlightenment

Sep 17 2022 The premise of Darkened Enlightenment is to highlight the fact that there currently exist a number of socio-political forces that have the design, or ultimate consequence, of trying to extinguish the light of reason and rationality. The book presents a critique of modernity and provides a socio-political and cultural analysis

of world society in the early twenty-first century. Specifically, this analysis examines the deterioration of democracy, human rights, and rational thought. Key features include a combination of academic analysis that draws on numerous and specific examples of the growing darkness that surrounds us along with a balanced practical, everyday-life approach to the study of the socio-political world we live in through the use of popular culture references and featured boxes. The general audience will also be intrigued by these same topics that concern academics including: a discussion on the meaning of

"fake news"; attacks on the media and a declaration of the news media as the "enemy of the people"; the rise of populism and nationalism around the world; the deterioration of freedom and human rights globally; the growing economic disparity between the rich and the poor; attempts to devalue education; a growing disbelief in science; attacks on the environment; pseudoscience as a by-product of unreasoned and irrational thinking; the political swamp; the power elites and the deep state; and the variations of Big Business that impact our daily lives. This book will make a great contribution to such fields as sociology, philosophy,

political science, environmental science, public administration, economics, psychology, and cultural studies.

Dayton Beer Dec 20 2022 The story of beer in Dayton and the Miami Valley is as old as the region's first settlers, who brought their brewing methods with them from Europe. From humble origins, the Schwind brothers founded a Dayton brewing dynasty. Adam Schantz arrived penniless and amassed a fortune as one of the city's early brewers. Martha Vorce, one of the region's

several unheralded woman brewers, was running the Springfield Brewery a decade before Eliza "Mother" Stewart gained fame there as a temperance leader. Although Prohibition swiftly destroyed this flourishing industry, today's local craft brewers promise to keep good beer and good times flowing for many years to come. Join local author Tim Gaffney as he explores the Valley's brewing heritage. *Immunity Boosting Medicinal Plants of the Western Himalayas* Jul 23 2020 This book presents a comprehensive guide to traditional immunity-boosting medicinal plants of the Himalayas, their traditional uses, phytochemistry,

pharmacology, diversity, conversation, biotechnology, toxicology, as well as future prospective. All the chapters cover the latest advances in ethnobotany, phytochemistry, biochemistry, and biotechnology. The book offers a valuable asset for researchers and graduate students of chemistry, botany, biotechnology, microbiology, and the pharmaceutical sciences. The main purpose of the present book is to draw on the rich culture, folklore, and biodiversity of immunity-boosting medicinal plants of the Western Himalayas, with particular emphasis on the Indian Trans-Himalayan and Western Himalayan region. All

the plants included in the present book are extensively used by the local tribes and people for their health-promoting properties from ancient times. This book will be a substantial contribution to the knowledge of the region and the country. Also, the book will be very useful to scientists, graduates, and undergraduates, along with researchers in the fields of natural products, herbal medicines, ethnobotany, pharmacology, chemistry, and biology. Further, it is an equally significant resource for a person working in different traditional medicinal systems; doctors (especially those engaged in Ayurveda, Chinese

traditional medicinal system, Amchi, and allopathy); the pharmaceutical industry (for drug design and synthesis); biochemistry and biotechnology sciences; and the agricultural sciences. [The Rough Guide to Las Vegas](#) Oct 18 2022 This handbook to the neon oasis incorporates tips on blackjack and other gaming options to give you the chance to leave Las Vegas without losing the lot. It includes coverage of the area's other sights, from watersports at Lake Mead to the Hoover Dam and the Valley of Fire, plus an account of the Strip's 100 year history. *The Impact of Beverages on Ingestive Behavior* Oct 14 2019

Nutrients is planning a Special Issue focusing on beverages and ingestive behavior. This Special Issue will focus on research related to all aspects of beverage consumption and post-ingestive consequences. There continues to be much controversy surrounding the influence of beverage choice on health outcomes. Research investigating the impact of beverage choice has on human health and post-ingestive consequences continue to grow. We know from the growing body of literature that beverage choice has a substantial impact on metabolism, food reinforcement and eating behaviors.

Regional Science Perspectives on Tourism and Hospitality Feb 10 2022 This book approaches the tourism and hospitality industry from a regional science perspective. By analyzing the spatial context of tourist travels, the hospitality sector, and the regional impacts of tourist activities, it demonstrates the value of the regional science paradigm for understanding the dynamics and effects of tourism and hospitality-related phenomena. Written by leading regional science scholars from various countries as well as professionals from organizations such as OECD and AirBnB, the contributions address topics such as

migration, new types of accommodation, segmentation of tourism demand, and the potential use of tracking technologies in tourism research. The content is divided into five parts, the first of which analyzes spatial effects on the development of firms in the tourism industry, while the second approaches temporal and spatial variability in tourism through analytical regional science tools. The broader economic and social impacts of tourism are addressed in part three. Part four assesses specific tourism segments and tourist behaviors, while part five discusses environmental aspects and tourism destination

policies. The book will appeal to scholars of regional and spatial science and tourism, as well as tourism specialists and policymakers interested in developing science and evidence-based tourism policies.

How to Win the War on Truth Nov 26 2020 Made to Stick by Chip Heath meets Thing Explainer by Randall Munroe in this illustrated guide to navigating today's post-truth landscape, filled with real-world examples of disinformation campaigns. The average person receives 4,000 to 10,000 media messages a day. It's no wonder we struggle to separate the news from the noise and fact from fiction--but

in these unprecedented times, it's essential to democracy that we do. For anyone struggling to figure out how to live--and vote--their values, *How to Win the War on Truth* is here to help. You'll learn:

- The history of propaganda, from Edward Bernays to Fox News
- Why simple messages are so powerful
- How social messaging creates unconscious biases
- Who profits from propaganda
- How propaganda is manufactured and delivered directly to you

Filled with real-world examples of disinformation campaigns that impact every citizen and clever illustration, *How to Win the War on Truth* will help you see the world with clear eyes for

the first time.

[Sacramento Beer](#) Apr 12 2022 Historically speaking, Sacramento benefited from a gold rush, an agricultural boom and, more recently, a brewing renaissance. The region's craft beer scene exploded from six to more than sixty breweries in about a decade, and the roots of that culture stretch back more than a century. Before Prohibition, thousands of acres of local hops supplied brewers across the country. Local farms are once again taking advantage of the temperate climate. In 1958, the University of California-Davis started America's foremost brewing science program, producing

hemiciclo.pt

some of California's top brewers. Rubicon's 1989 award-winning IPA was just the beginning for the current, innovative resurgence. Author Justin Chechourka explores the complexities and nuance of this fermenting heritage.

The English Press Jan 29 2021 In this succinct one-volume account of the rise and fall of the English press, Jeremy Black traces the medium's history from the emergence of the country's newspaper industry to the Internet age. The English Press focuses on the major developments in the world of print journalism and sets the history of the press in wider currents of English history,

political, social, economic and technological. Black takes the reader through a chronological sequence of chapters, with a final chapter exploring possible scenarios for the future of print media. He investigates whether we are witnessing the demise or simply a crisis of the press in the aftermath of the News of the World scandal and Levinson Inquiry. A new title by one of the most eminent historians of Britain and a leading expert on the history of the press, The English Press will appeal to undergraduate students of British and media history and journalism, as well as to the general reader with an interest in the history of England and the media.

Sustainability Made Simple Sep 05 2021 Sustainability Made Simple explores the relationship between everyday life and the intricate global environmental issues of today, illustrating how small changes in daily routines and mentalities can add up to a big impact.

Platforms and Cultural Production Nov 14 2019 The widespread uptake of digital platforms - from YouTube and Instagram to Twitch and TikTok - is reconfiguring cultural production in profound, complex, and highly uneven ways. Longstanding media industries are experiencing tremendous upheaval, while new industrial

formations - live-streaming, social media influencing, and podcasting, among others - are evolving at breakneck speed. Poell, Nieborg, and Duffy explore both the processes and the implications of platformization across the cultural industries, identifying key changes in markets, infrastructures, and governance at play in this ongoing transformation, as well as pivotal shifts in the practices of labor, creativity, and democracy. The authors foreground three particular industries - news, gaming, and social media creation - and also draw upon examples from music, advertising, and more. Diverse in its geographic

scope, *Platforms and Cultural Production* builds on the latest research and accounts from across North America, Western Europe, Southeast Asia, and China to reveal crucial differences and surprising parallels in the trajectories of platformization across the globe. Offering a novel conceptual framework grounded in illuminating case studies, this book is essential for students, scholars, policymakers, and practitioners seeking to understand how the institutions and practices of cultural production are transforming - and what the stakes are for understanding platform power.

**The Wiley Blackwell
Companion to Race,
Ethnicity, and Nationalism**

Aug 16 2022 A broad examination of the rise of nationalism, populism, xenophobia, and racism throughout the world The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism provides expert insight into the complex, interconnected factors that are influencing patterns of human relations worldwide in a time of rising populist nationalism, intensified racial and religious tensions, and mounting hostilities towards immigrants and minorities. Analyzing the underlying forces which

continue to drive global trends, this volume examines contemporary patterns based on the most recent evidence spanning five continents—offering a diversity of interpretations, models and perspectives that address the challenges facing the study of race, ethnicity, and nationalism. The Companion features original contributions by both established experts and emerging scholars that explore an expansive range of theoretical, historical, and empirical case studies. Organized into five sections, the text first discusses growing trends in the United States, the significance of populism in major societies around the

globe, and how global changes are influencing regional variations in race, ethnicity, and nationalism. An investigation of global migration patterns is followed by examination of conflict and violence, from urban riots and boundary disputes to warfare and genocide. The final section focuses on the policy debates resulting from changing patterns and their impact on politics, the economy, and society. Timely and highly relevant, this book: Discusses contemporary issues such as the failure of school systems to provide equal opportunities to minorities, the evolution of the School-to-Prison pipeline, and the Black Lives Matter

movement Explores shifts in American race relations, the influence of social media and the internet, and the links between increased globalization and contemporary forms of nationalism, racism, and populism Features essays on national and ethnic identity in China, Japan, and South Korea, India, Central Asia, Africa, Latin America, and Europe Analyzes policies regarding borders, immigration, refugees, and human rights in different countries and regions Offers perspectives on the radicalization of social movements, the creation of ethnic, linguistic and other boundaries between groups,

and the models used to understand intractable conflicts in many global settings The Wiley Blackwell Companion to Race, Ethnicity, and Nationalism is an indispensable resource for scholars, researchers, instructors, and students across the social sciences, including sociology, political science, global affairs, economics, comparative race and ethnic relations, international migration, social change, and sociological theory.

Drunk in China Aug 04 2021 China is one of the world's leading producers and

consumers of liquor, with alcohol infusing all aspects of its culture, from religion and literature to business and warfare. Yet to the outside world, China's most famous spirit, baijiu, remains a mystery. This is about to change, as baijiu is now being served in cocktail bars beyond its borders. Drunk in China follows Derek Sandhaus's journey of discovery into the world's oldest drinking culture. He travels throughout the country and around the globe to meet with distillers, brewers, snake-oil salesmen, archaeologists, and ordinary drinkers. He examines the many ways in which alcohol has shaped Chinese society and

its rituals. He visits production floors, karaoke parlors, hotpot joints, and speakeasies. Along the way he uncovers a tradition spanning more than nine thousand years and explores how recent economic and political developments have conspired to push Chinese alcohol beyond the nation's borders for the first time. As Chinese society becomes increasingly international, its drinking culture must also adapt to the times. Can the West also adapt and clink glasses with China? Read Drunk in China and find out.

Kansas Beer: A Heady

History May 13 2022

Prohibition came early to Kansas in 1881, driving more

than 125 breweries out of business or underground. Refusing to even vote on the 1933 national repeal, the state remained dry until 1948, with liquor by the drink finally being approved in 1987. Lawrence's Chuck Magerl worked with the legislature to pen new laws allowing something (little known at the time) called a "microbrewery." Chuck started the state's first brewery in over a century, appropriately named Free State Brewing Company. John Dean of Topeka's Blind Tiger Brewery counts more awards than any other brewer in the state, including Champion Brewer at the World Beer Cup in 2014. Props & Hops Brewing, in tiny Sylvan

Grove, is owned and operated by an enterprising pilot who also owns and operates a crop-dusting business on the weekdays. Author Bob Crutchfield explores the state's breweries and recounts the Sunflower State's hoppy history.

2020 Nutritional Oncology: Nutrition in Cancer Prevention, Treatment, and Survivorship presents evidence-based approaches to the study and application of nutrition in all phases of cancer including prevention, treatment, and survivorship. There is a long history of interest in the role of nutrition in cancer but only in the last 50 years has this interdisciplinary field developed scientific evidence from a combination of population studies, basic research, and clinical studies.

Precision oncology, targeted therapies and immunonutrition have led to advances in cancer treatment and prevention. Highlighting insights from Precision Oncology and Precision Nutrition to improve cancer prevention, treatment and survival is the core mission of this book. The editors have over 40 years of clinical and research experience integrating science with practical advice based on available evidence for healthcare professionals while highlighting research vistas for the scientific community.

Features: Comprehensive treatment of all aspects of nutrition and cancer, including prevention, response to treatment, avoidance of relapse and promotion of quality of life for cancer survivors. Examines alternative medicines and botanical dietary supplements and identifies hypotheses for future research based on science. This book is written for doctors, dietitians, and other health care professional advising cancer patients, cancer survivors and the general public.
