Human Resource Management in Mastering Business in Asia Series Sep 12 2021

Mastering Business in Asia: Human Resource Management is a rare and timely book that explores talent management from an Asian angle. Written by consultants from one of the world's leading consultancies in human resource management, it is aimed at helping Asian managers understand the best practices in human resource management in order to accelerate growth in their own markets. It is required reading for any HR professionals and business managers working in Asia.

Labour Markets and Human Resource Planning in Asia Mar 06 2021 Questions whether manpower planning mainly considered as a public sector activity should give way to labour market analysis as the dominant means of human resources development planning. Covers financing and privatization of education and training, the gender dimensions of labour market analysis, and the nature of labour market responses during economic adjustment and restructuring.

Management and Planning of Mangrove Resources in Asia Mar 26 2020

Overexploitation of any single mangrove product, or the direct destruction of mangrove and nipa, are considered to be the most serious problems to be faced in coastal management in Southeast Asia. This paper argues that main cause of these problems is the failure to clearly express the social and economic significance to society of the complex web of resource opportunities offered by mangrove systems. There is also a need to developed management guidelines which incorporate ecologic, economic and social parameters and which can be clearly understood and implemented by people responsible for the formulation of mangrove development policies. A series of guideline themes are presented. [Author's abstract].

Redefining Diversity and Dynamics of Natural Resources Management in Asia, Volume 3 Jan 24 2020

Redefining Diversity and Dynamics of Natural Resources Management in Southeast Asia, Volumes 1-4 brings together scientific research and policy issues across various topographical areas in Asia to provide a comprehensive overview of the issues facing this region.

Natural Resource Dynamics and Social Ecological Systems in Central Vietnam: Development, Resource Changes and Conservation Issues, Volume 3, focuses on the issues specific to Central Vietnam that are also found globally. War had significantly impacted both land and water resources, from which it had to recover environmentally. Additionally, this is an area with growing urbanization pressures and industrial development, both of which are known for stretching resources beyond their limits. The introduction of several hydro-electric power projects have even further eroded the local agricultural and forest ecosystems. This volume looks at Central Vietnam

holistically, from management and use to policy and data-driven solutions. Provides land management practitioners and policy makers with the tools to deal with natural resource issues in a developing nation Reviews the impacts of the first PES, Payment for Ecosystem Services, policies upon which were based similar programs in Latin America Reviews the current and potential future land management of Central Vietnam, giving an eye to solutions for any nation impacted by war, trying to balance development with conservation efforts and provide their populations with sustainable economic futures Examines Central Vietnam holistically, from management and use to policy and data-driven solutions

A History of Natural Resources in Asia Feb 17 2022 Much has been written about the wealth of nations, the history of unequal distribution and zones of affluence and deprivation within and between societies. This book explores why some Asian nations are more prosperous than others through an examination of how their interaction with and utilization of resources has changed over the centuries.

Strengthening Domestic Resource Mobilization in Southeast Asia Dec 03 2020 This report shows why Southeast Asian countries need to consider fresh taxation policies after many struggled to finance massive public expenditure programs to combat COVID-19. The second in a four-part series, it considers the impact of the pandemic on countries including Cambodia and Thailand to lay out steps policymakers can take to create healthier fiscal spaces. It illustrates the challenges around informality, collection, and progressivity, and details quick-fix measures designed to increase revenues. It emphasizes how preventing fraud, taxing wealth, and introducing environmental levies can help reduce poverty, tackle inequality, and contribute toward more sustainable growth.

The Changing Role of the Human Resource Profession in the Asia Pacific Region Jul 30

2020 *The human resource (HR) profession has been on a long and challenging journey. Globalisation and sweeping policy changes have re-defined and re-aligned HR and its role. It is important for HR professionals to develop and become innovators in their respective industries. The Changing Role of the Human Resource Profession in the Asia Pacific Region is based on case-studies of retail, tourism, healthcare, security, education, and energy, spread across the greater Asia Pacific (AP) region. The book rests on the principle of the laws of attraction, that 'thoughts become things' and argues that acknowledging good human resource policies and practices can be a key influence on all aspects of an organisation. After an introduction, five chapters cover key topics: six major industries; changing HR practices across the AP; an insider's view on best practices; the role of HR in sustaining growth across the AP; and a conclusion looking towards the future of HR in the Asian Pacific Region. Based on real and contemporary case studies with a focus on six industries (Retail, Tourism, Healthcare, Security, Education and Energy) spread across the Greater AP region Highlights industry specific key HR challenges and suggests ways forward Records recent developments*

The Changing Global Environment in Asia and Human Resource Management Strategies Jan 04 2021 "Examining how meso- and macro-economic global change impacts human resource management policies of countries and the strategies of firms investing into or from key Asian countries is the focus of this ground-breaking study. The introductory section encompasses several chapters dealing with a number of current policy issues in core Asian countries, such as: China's drive for artificial intelligence; an evaluation of Japan's Abenomics; and regionalism. The section also analyses the evolving macro-economic framework surrounding the internationalization process of Chinese MNEs in European countries, and the specific case of Chinese investment in Japan. This overall framework concludes with an examination of the lifelong learning policies in a European Union country (namely Italy) opening thereby the discussion on human resource management (HRM) issues in the following section of the book. The study of human resource management policies and strategies is appraised from diverse complementary angles. The chapters in the second section of the book provide the reader with a detailed and up-to-date account of expatriation strategies from China, HRM strategies of French MNEs in China, teleworking, training and labor force issues in

Japan and knowledge absorptive capacity issues in rural Thailand. Written by a core group of international experts, Changing Global Environment in Asia and Human Resource Management Strategies will appeal to students, scholars, policy makers as well as business practitioners studying and/or working in the areas of business studies, human resource management and international political economy"--

Towards a Sustainable Asia Oct 01 2020 This series of books are the output of the research project called "Sustainable Development in Asia (SDA)", which was initiated by the Association of Academies of Sciences in Asia (AASA). They are comprised of one synthesis report, which entitled "Towards a Sustainable Asia: Green Transition and Innovation", and four thematic reports on natural resources, energy, the environment and climate change, and culture from particular perspectives of agriculture. They aim to: 1) investigate common sustainability issues faced by all Asian countries, including population increase, poverty alleviation, pollution control, ecological restoration, as well as regional problems, such as water shortage in West and Central Asia, energy security in Northeast Asia, development model & transformation in East Asia; 2) analyze and summarize of best practices towards sustainable development in Asia; 3) bring forward suggestions and policy options for promoting green transition, system innovation and sustainable development of Asia. With best practice guidelines for a sustainable Asia, this series of reports, for the first time systematically address the common challenges and regional problems in regard to Asia's natural resources use, pollution reduction and climate protection, sustainable energy development, and innovations for environment-friendly and culture-compatible agriculture. They will provide handy and useful information to researchers, government policy makers and the general public who have concerns about Asia's sustainable development. AASA is a scientific and technological organization in Asia, established in 2000, comprising of 26 member academies all over Asia. Its vision is to provide a forum for the discussion of all issues relevant to science and technology development and its application on national level within Asia.

Development Centre Seminars Sustainable Recovery in Asia Mobilising Resources for Development May 28 2020 Two-thirds of the world's poor live in Asia. The major objective for the region, therefore, must be to reduce poverty. It has become clear in the wake of the crisis that the public sector can no longer shoulder the burden of financing pro-poor ...

Economic Depreciation of Natural Resources in Asia and Implications for Net Savings and Long-run Compensation Jun 21 2022

Asia and Pacific Jan 28 2023

The Open Economy and the Environment Aug 11 2021 This work asks what globalization means for environmental quality and the use of natural resources in developing economies. The authors develop theoretical models that trace the effects of trade and trade liberalization on sectoral resource allocation, factor returns, income and

welfare, as well as incentives to clear forest and degrade agricultural land. The models reflect important developing economy features including spacial distinctions between uplands and lowlands, open-access forest resources and the special features of domestic food products. The authors also analyse representative economy submodels, explore empirical cases based on applied general equilibrium models of Asian economies, and examine welfare and environmental implications of migration, trade liberalization and development policy.

New Industrial Technologies and Human Resource Development in Asia Feb 23 2020
The Handbook of Human Resource Management Policies and Practices in Asia-Pacific Economies Nov 14 2021 'There is considerable rigour behind the work and the contexts are well positioned. The books have excellent HR data for not only businesses, but employees considering a transfer to an international location. In addition to the primary authors cadres of industry advisors were assembled of considerable status and representing mainstream organisations and unions. The countries covered total twenty one and, in addition, there is a summary chapter in volume two on issues, trends and implications. Obviously there are other reference points available on single countries and indeed dual country comparisons, but this work is timely, highly relevant and extremely valuable. It is recommended most highly.' – Geoffrey N. De Lacy, Australian Human Resource Institute Journal 'A very welcome and valuable addition to the literature, this two-volume handbook covers current HRM policies and practices in all 21 APEC (Asia-Pacific Economic Cooperation) member economies. For the first time, we have single-source access to a codified set of macro-level HRM profiles for APEC membership economies . . . this project helps fill the need for systematic and accurate HRM data in a very large geographic area, including four continents divided by the Pacific Ocean . . . this is an impressive compilation and will benefit government and business organizations when formulating strategy for employment relations. It will also assist those in the academic sector with the research and teaching of cross-cultural management issues. It should be a welcome addition to most academic and special libraries with interests in the Asia and the Pacific.' – David A. Flynn, Business Information Alert It is becoming increasingly recognised that the way in which human resources are managed is a key source of sustainable competitive advantage for business. Nowhere, Michael Zanko argues, is this seen to be more relevant than in the Asia-Pacific region. The aim of the Handbook and its systematically codified economy human resource management (HRM) profiles is to improve knowledge and understanding of HRM policy and practices in the Asia-Pacific region. It serves as a practical guide to predominantly macro-level HRM policies and practices in ten APEC economies, covering Australia, Chinese Taipei (Taiwan), Hong Kong, Indonesia, Japan, Korea, Malaysia, People's Republic of China, Thailand and the United States of America. The Handbook of Human Resource Management Policies and Practices in Asia-Pacific Economies Volume

I will be essential reading for lecturers, researchers, academics and managers concerned with human resource management, international business, management, and cross-cultural studies. The Handbook will also be of great interest to those involved in industrial and employment relations.

Advances in Human Resource Management in Asia Oct 25 2022 Human resource management performs a different function and operates very differently in Asia to its practice in the US and Europe. This volume demonstrates how human resource management is enacted in Asian countries, how it is changing in response to recent economic events, and how firms are linking indigenous and external human resource management learning. Examples are taken from firms in Japan, China, Korea and Thailand, and these domestic approaches are then considered in the context of joint ventures. As well as providing a detailed analysis of Asian human resource management, contributors with perspectives from both the East and the West show how multinational firms can incorporate Asian thinking and acting into a modern business strategy for successful human resource development in international ventures.

Routledge Handbook of Politics in Asia Oct 21 2019 The Routledge Handbook of Politics in Asia is designed to serve as a comprehensive reference guide to politics in Asia. Covering East, South, Southeast, and Central Asia, this handbook brings together the work of leading international academics to cover the political histories, institutions, economies, and cultures of the region. Taking a comparative approach, it is divided into four parts, including: A thorough introduction to the politics of the four regions of Asia from the perspectives of democratization, foreign policy, political economy, and political culture. An examination of the "Big Three" of Asia – China, India, and Japan – focusing on issues including post-Mao reform, China's new world outlook, Indian democracy, and Japanese foreign policy. A discussion of important contemporary issues, such as human rights, the politics of the internet, security, nationalism, and geopolitics. An analysis of the relationship between politics and certain theoretical ideas, such as Confucianism, Hinduism, socialist constitutionalism, and gender norms. As an invaluable and all-inclusive resource, this handbook will be useful for students, scholars, researchers, and practitioners of Asian politics and comparative politics.
