*Asia* Sep 23 2022 This paper reviews gender budgeting efforts in Asia. The countries in the region have achieved mixed success in improving gender equality. Gender budgeting is ideally a fiscal innovation that translates gender-related goals into budgetary commitments and can help countries to achieve the Sustainable Development Goals with regard to gender equality. India has

a sustainable gender budgeting model for the region, while a few countries in the region have begun such efforts more recently. The legislative mandates for gender budgeting in the Philippines and South Korea are remarkable achievements and are contributing to their efforts. **Human Rights and Budgets in India** Apr 06 2021 Papers presented at the conference held at Shimla in India from 28-30 May 2008.

**A Pragmatic Study of Budget Announcements & Stock Market Performance** Jan 15 2022 The stock market behaviour and trend can be move according to the different internal, external, micro economic and macro economic factors. The impact of some events that definitely occurs can't be envisaged by the stock market with confidence due to their nature. A budget is an influential instrument in the hands of the Government to control the fiscal resources of country. The Government Budget announcement is one of the important factors as it is related to the financial or economic health of country involving all the industries. The study considered the stock market behaviour on pre and post announcements of Govt. budgets (India: Union Budget, US: Federal Budget and UK Govt. Budget) covering the period of study F.Y. 2008-09 to 2010-11. For analysis only trading days have been taken into consideration and different statistical measures applied.

**Union Budget of India for 2011-12 - Its Scope and Direction** Mar 05 2021 Mr Pranab Mukherjee, the honourable Finance Minister of India placed the budget for the financial year 2011-12 in the Parliament under a special circumstance as the nation was undergoing a volatile socio-economic and political phase for the last couple of months. All sections of Indian society had their own expectations from the budget. The corporate world was expecting big ticket reform, the middle class householders were eagerly looking for some benefit or relief from the budget, the coalition partners were expecting a gimmick as the assembly election of five key states were knocking at the door. It was a really challenge for the finance minister to meet the expectations of all sections.

*Gender Responsive Budgeting- A Tool for Gender Equality* Oct 24 2022 This book focuses on the realistic challenges faced by the implementation of Gender Responsive Budgeting in India. It gives insight about the various tools and implementation methods for the gender equality. Assessing budgets through a gender lens requires thinking about government finances in a new way. It calls for including equity in budget performance indicators and examining the impact of budget policies on gender equality outcomes. It also focuses on the relation between government spending and women's time spent in unpaid care work such as water and fuel collection, caring for the sick, childcare and many others. Conducting a gender-responsive budget analysis can be seen as a step not only towards accountability to women's human rights, but also towards greater public transparency and economic efficiency. However, the work argues to focus on the broader framework because that would show the actual commitment of the state. Vacuum analysis would provide wrong inputs thus there is need to see gender budgeting in consonance to the entire budgetary allocations and concerned ministries allocation.

*Public Budgeting in India* Nov 13 2021 This book explores public budgeting in India. As government finances play an important role in the social and economic development of a nation, it focuses on public budgeting in the context of India. The respective chapters not only discuss the underlying principles of budgeting, but also address the practical issues related to the

government's financial operations and their macro-economic implications. Recently there has been considerable debate surrounding the size of government, with the neo-liberal framework advocating a very limited governmental role. This book provides comprehensive information on the practical aspects of public budgeting with regard to how governments raise revenues, how they are spent, the nature of public services provided, and their implications for the social and economic development of the country against the backdrop of public budgeting theory. The topics covered include the constitutional fiscal framework; theories, structure and issues related to budgets; mechanisms of budget construction, budget execution, public budgeting and performance assessment; government accounting; and financial accountability.

*Military Budgets in India and Pakistan Dec 14 2021* "The strategic competition between India and Pakistan is evolving, with India outpacing Pakistan in conventional capabilities while Pakistan seeks to compete with nuclear capabilities. India's economy is eight times larger than Pakistan's, and may be 15 times larger in 2030. Absent reconciliation between India and Pakistan, how each state converts economic power into military strength will reflect longstanding grievances. India's advantages are diminished by an ad hoc approach to defense budget management and other constraints, but long term trends point to Indian ascendance. Pakistan cannot match India conventionally in the long term, and any attempt to do so will exhaust its economy. Responding to adverse defense spending trends with increased reliance on nuclear weapons, especially short-range weapons, may be a cost effective approach, but it is likely to diminish Pakistan's national security"--Publisher's web site.

*Public Expenditure in India Jan 23 2020* Government is a major player in the development of an economy. Government's public financial operations involving mobilization of revenue, and its spending has considerable implications on the growth, distribution and stability necessitating a careful study to enable informed mid course policy corrections to the macroeconomic developments. A critical review of public expenditure is imperative in ensuring optimal use of public resources for the maximization of welfare. The book provides an empirical understanding of historical trends and composition of public expenditure at the central and the sub national levels; the effectiveness of public expenditure control systems and accountability issues; the political economy of spending decisions; public expenditure reforms undertaken in India and international best options that can guide the corrective process in India. Given the global shift in

focus from 'outlays' to 'outcomes' it is important to put in place a sound framework to track the results of government expenditure programs to guide the informed expenditure decision making process. The book documents the features of useful frameworks and steps involved in adopting a robust results framework. Fiscal management of Covid-19 is an important component of the book. The purpose of this volume is to reach out a comprehensive and updated understanding of empirical issues in public expenditure and its management in India to the students of Public Finance.

**East India (financial Statement and Budget, 1920-21). Financial Statement and Budget for 1920-21, and Discussions Thereon in the Legislative Council of the Governor-General** Sep 30 2020

The Influence of Gender Budgeting in Indian States on Gender Inequality and Fiscal Spending Nov 25 2022 This study investigates the effect of gender budgeting in India on gender inequality and fiscal spending. Gender budgeting is an approach to budgeting in which governments use fiscal policies and administration to address gender inequality and women's advancement. There is little quantitative study of its impact. Indian states offer a relatively unique framework for assessing the effect of gender budgeting. States with gender budgeting efforts have made more progress on gender equality in primary school enrollment than those without, though economic growth appears insufficient to generate equality on its own. The implications of gender budgeting for fiscal spending were more ambiguous.
