Religious activity flourished in the eighteenth-century navy; this book examines the reasons why and its manifestations. The Evangelical Admiral Gambier, notorious for distributing tracts to his fleet in a theatre of war, is commonly seen as a misfit in a fighting service that had scant time for fervent piety. In fact, the navy of the Revolutionary and Napoleonic Wars showed a level of religious observance not seen since the days of Queen Anne. Evangelical laymen provided one dynamic for this change: concentrating first on public worship, they moved to active proselytism in search of converts amongst sailors, and in a third phase developed a loose network of prayer groups in scores of ships, uniting officers and seamen in voluntary gatherings that transcended rank. This book explores the effect this new piety had on discipline and human governance, on literacy, on the development of chaplains' ministry and on the mindset of the officer corps. It also looks at the larger question of how its values were absorbed into the ethos of the navy as a whole. It draws on sources both familiar and unusual - logs, letters, minutes, memoirs, tracts and sermons, Regulations - to explain how evangelical influence affected officer corps, lower deck and Admiralty, showing how a movement that began by promoting public worship at sea became an agency for mass evangelism through literature, preaching and off-duty gatherings, where officers and men met for shared Bible reading and prayer a mere decade after the great Mutinies. Reprint of the original, first published in 1861. This book focuses on the Royal Navy's response to the rise of the German navy under Hitler within the broad context of the ongoing debate about Britain's policy of appeasement. It combines a narrative of diplomatic events and Whitehall policy-making with the thematic analysis of naval intelligence and war planning. Drawing on the wide range of sources, the author argues that the Admiralty's enthusiasm for naval

armaments diplomacy with Nazi Germany was far more rational and more complex than previous studies would suggest. This comprehensive survey of the British Navy at a time of technological development was published between 1882 and 1883. This volume provides the first comprehensive history of education and training for officers of the Royal Navy in the eighteenth and nineteenth centuries. It covers the development of educational provision, from the first 1702 Order in Council appointing schoolmasters to serve in operational warships, to the laying of the foundation stone of the present Royal Naval College Dartmouth in 1902.

Educating the Royal Navy 1702-1902 includes the establishment of the Royal Navy's first naval academy, the commissioning of the officer training ship HMS Britannia, and the conduct of education at sea. It also covers the birth of higher education in the Service with the opening of the Royal Naval College Greenwich, and the provision of technical education and training for a new category of officer, the naval engineer. This book will be essential reading for students of naval history and naval education, and of much interest to professional military colleges studying the development of naval training. Reprint of the original, first published in 1860.

This book examines the formulation and the implementation of the Royal Navy's policy towards German naval disarmament after the Second World War. This first detailed study of the use of radar begins with its invention in the mid-1930s and shows how it was applied at sea as the war approached and how procedures and applications changed as the war proceeded. Description: Blackened brass cap badge with rope and anchor in circular disc with crown on top. The buttons have crown and anchor motifs. In this well researched and informative history, the author outlines the role of the Polish Navy from its creation through World War II, including major battles and operations in the Atlantic, Mediterranean,

and Arctic. Divided into eleven chapters and supplemented with seven appendices, Poland's Navy, 1918-1945 also includes a comprehensive listing of bibliographical resources and an index of names of ships, officers, and other important figures. From the youngest ever Secretary of the Navy comes an action-packed history of the service and the heroic men, great ships and epic battles that made it the world's greatest. photos. Maps.
