To counteract the challenges of complex reading content, text leveling is a vital necessity for readers with limited language access. A transdisciplinary analysis of reading development and linguistic interrelations builds the theoretical foundation of the base-1 method. This method focuses solely on structural and functional text elements on the word, sentence and cohesion level. But this book also discusses the significance of other prevalent readability factors, such as the reader's language knowledge or socio-cultural background. The base-1 method is designed to level early reading texts in German and other alphabetic languages. Experimental tests with a German immersion population has led to a preliminary calibration to demonstrate the validity of this approach. Bernd Nuss ist erfahrener Immersionslehrer in verschiedenen Programmen, die sich über Nord-, Zentral- und Südamerika erstrecken. An der E. E. Waddell Language Academy wirkt er schulintern als Immersion Facilitator, kooperiert mit Bildungsorganisationen und betreut die Praktika von Gaststudierenden an der Schule. Bernd Nuss has worked as an educator and facilitator in English and German language immersion programs all over the Americas and in Europe. In this capacity, he has also been collaborating as a researcher with universities and other educational institutions in Europe, Asia, and the USA. This collection examines the ways in which women have used political rhetoric and political discourse to provide leadership, or assert their right to leadership, at the national level. While over the years women have broken through traditional roles, they are still underrepresented in political leadership. In this text, scholars consider the various factors that continue to restrict political leadership opportunities for women as well as some of the ways in which individual women have strategically sought to enact political power and leadership for themselves. The contributors analyze various case studies of leadership positions at the national level, looking at women who have run, been nominated to run, or appointed to national positions. The interdisciplinary approach lends itself to: rhetoric; political rhetoric; political discourse; leadership studies; women's studies; gender issues; satire; pop culture. Word grammar is a theory of language structure and is based on the assumption that language, and indeed the whole of knowledge, is a network, and that virtually all of knowledge is learned. It combines the psychological insights of cognitive linguistics with the rigour of more formal theories. This textbook spans a broad range of topics from prototypes, activation and default inheritance to the details of syntactic, morphological and semantic structure. It introduces elementary ideas from cognitive science and uses them to explain the structure of language including a survey of English grammar. This volume offers a selection from the papers presented at the 2005 Annual Symposium on Arabic Linguistics, held at the University of Illinois at Urbana-Champaign. The papers cover a variety of topics in Arabic Linguistics, ranging from the lexicon, phonology, syntax and computational linguistics.
