Norman Polmar's revised and updated, two-volume classic describes the political and technological factors that influenced aircraft carrier design and construction, meticulously records their operations, and explains their impact on modern warfare. Volume I provides a comprehensive analysis of carrier developments and warfare in the first half of the twentieth century, and examines the advances that allowed the carrier to replace the battleship as the dominant naval weapons system. Polmar gives particular emphasis to carrier operations from World War I, through the Japanese strikes against China in the 1930s, to World War II in the Atlantic, Mediterranean, Arctic, and Pacific theaters. It begins with French inventor Clément Ader's remarkably prescient 1909 description of an aircraft carrier. The book then explains how Britain led the world in the development of aircraft-carrying ships, soon to be followed by the United States and Japan. While ship-based aircraft operations in World War I had limited impact, they foreshadowed the aircraft carriers built in the 1920s and 1930s. The volume also describes the aircraft operating from those ships as well as the commanders who pioneered carrier aviation. Aircraft Carriers has benefited from the technical collaboration of senior carrier experts Captain Eric M. Brown and General Minoru Genda as well as noted historians Robert M. Langdon and Peter B. Mersky. Aircraft Carriers is heavily illustrated with more than 400 photographs—some never before published—and maps. Volume II, which is forthcoming from Potomac Books in the winter 2006-2007 (ISBN 978-1-57488-665-8), will cover the period 1946 to the present. Omhandler den gejstlige tjeneste og feltpræsterne i den amerikanske flåde i perioden 1778 til 1954. Mai come nell'ultimo periodo il mercato delle quattro e delle due ruote è stato tanto in fermento da determinare una vera e propria metamorfosi delle reti distributive. Calo vertiginoso della domanda, inasprimento della concorrenza, aumento degli standard quantitativi e qualitativi richiesti dalle Case produttrici, maggiore ricorso a fonti di finanziamento esterne, diminuzione della redditività, sono solo alcuni dei tanti nuovi mostri sperimentati da chi vende e ripara auto e moto. Questa evoluzione rende necessaria la conoscenza di tecniche di gestione tipiche di un settore in cui la passione non può più pilotare il destino delle aziende. Questo primo manuale di Dealership Management italiano, dedicato al settore automotive, spiega a fondo tutti gli aspetti del mercato e dell'organizzazione aziendale. Attraverso esempi concreti e dalla viva voce dei top manager delle più importanti Case italiane di auto e moto, offre importanti soluzioni a molti dei problemi emersi negli ultimi anni e le mosse per anticipare la ripresa. La prefazione del libro è un'intervista a Giuseppe Volpato (professore ordinario di Economia e gestione delle imprese presso l'Università Ca' Foscari di Venezia, membro dello Steering Committee del Groupe d'Étude et Recherche Permanent dans l'Industrie et les Salaires de l'Automobile di Parigi e Senior Adviser dell'International Car Distribution Programme di Birmingham), che ci aiuta a decifrare con rigore scientifico l'evoluzione in atto nel business model della distribuzione automotive.
