**Il rischio di default nel mercato azionario italiano** Nov 24 2022 La misurazione e gestione del rischio di credito rappresenta un tema centrale nel sistema economico, ancor di più in periodi storici come quello corrente dominato dalla crisi internazionale del debito. Il principale effetto negativo derivante dal rischio di credito è la perdita di fiducia del creditore nei confronti del debitore; il tema diventa sistemico nella misura in cui aumentano gli scandali e i fallimenti nei mercati finanziari, incrementando una generale perdita di fiducia degli investitori nei confronti del mercato come strumento di crescita economico/finanziaria. Il presente volume offre una panoramica teorica ed empirica, presentando inizialmente i più rilevanti contributi accademici che hanno determinato alcuni punti cardine nell'evoluzione scientifica del tema e offrendo in secondo luogo un'analisi empirica dettagliata dei principali modelli previsionali, applicati al mercato azionario italiano.

*The International Payments and Monetary System in the Integration of the Socialist Countries* Feb 21 2020 Economic cooperation between the CMEA countries is implemented according to the monetary and financial regulations worked out collectively. The regulations cover the organizational structure of international settlements; the choice of currency for settlements; the principles of international credit transactions; the determination of the exchange rate of the currency used in international settlements to national currencies and to convertible currencies outside the CMEA; the principles and rules of international exchange and transfers; rules for the currency allotments of citizens (roles of international transfers for citizens). The regulations also contain provisions for international settlements and credit transactions which are concluded through an independent international bank or banks. These regulations, the instruments and institutions together, form the international payments and monetary system of the CMEA. \* The financial and monetary regulations of the CMEA community were formed in several stages, depending on the prevailing conditions and the targets to be attained. In the years between 1949 and 1963 the general form of economic cooperation and of international settlements was the bilateral clearing agreement. In the bilateral agreements which the Soviet Union concluded with the other CMEA countries the currency of settlements was the Soviet rouble. The prices applied in foreign trade were not the internal producer prices of the Soviet Union, but world market prices (main international market prices) expressed in roubles, with the help of the exchange rate of the Soviet rouble to the US dollar, as quoted in the Soviet Union.

*De wielermaffia* Oct 23 2022 Tyler Hamilton was een van de meest geliefde en snelste wielrenners ter wereld. Zijn jarenlange dopinggebruik heeft hij altijd ontkend. In *De wielermaffia* vertelt hij voor het eerst zijn verhaal. Hij laat zien hoe de wereld van het

professionele wielrennen met de komst van het `wondermiddel EPO midden jaren negentig in korte tijd drastisch veranderde. Om in de Tour met de besten mee te kunnen komen, kon je niet anders dan doping gebruiken. Meer nog dan Hamilton was zijn vriend en ploeggenoot Lance Armstrong een spin in het dopingweb. Hij was het die EPO faciliteerde, contacten onderhield met de meest vooraanstaande artsen onder wie de sluwe Italiaanse dokter Michele Ferrari en zijn mederenners dwong om doping te gebruiken.
