Mental Accounting in Managers' Preferences Related to Aggregation Versus Disaggregation Income Statement Items Apr 27 2020 Objective - The objective of this study is to observe the mental accounting of managers when choosing between aggregate or disaggregate items in income statements. Managers who experience mental accounting may behave opportunistically because they may consider cost-benefits based on which of the two has a higher utility. Methodology/Technique - The analytical tools used in this research include a descriptive statistical analysis and the Analytical Hierarchy Process (AHP) is used to determine aspects affecting the preparation of the empowerment model. In the Qualitative analysis of the implementation of the empowerment model, data will be drawn from focus group discussions and in-depth interviews. Findings - The test results of the research experiment using MANOVA Test (Factorial Design) with SPSS 23 found that overall, the managers will support the presentation of aggregate or disaggregate based on which one of the two has a higher utility. Therefore, managers' preferences related to items of gains and losses in the income statement are consistent with mental accounting. Novelty - The outcome of this study could be used to explain how the parties involved in external financial reporting and voluntary disclosure behave in accordance with the principles of the theory of mental accounting.

Price, president, Franklin Mutual Advisors, Inc. Benjamin Graham has been called the most important investment thinker of the twentieth century. As a master investor, pioneering stock analyst, and mentor to investment superstars, he has no peer. The volume you hold in your hands is Graham's timeless guide to interpreting and understanding financial statements. It has long been out of print, but now joins Graham's other masterpieces, *The Intelligent Investor* and *Security Analysis*, as the three priceless keys to understanding Graham and value investing. The advice he offers in this book is as useful and prescient today as it was sixty years ago. As he writes in the preface, "if you have precise information as to a company's present financial position and its past earnings record, you are better equipped to gauge its future possibilities. And this is the essential function and value of security analysis." Written just three years after his landmark *Security Analysis*, *The Interpretation of Financial Statements* gets to the heart of the master's ideas on value investing in astonishingly few pages. Readers will learn to analyze a company's balance sheets and income statements and arrive at a true understanding of its financial position and earnings record. Graham provides simple tests any reader can apply to determine the financial health and well-being of any company. Bookkeeping Aug 12 2021 Are you looking for a complete guide on bookkeeping? Then keep reading... Bookkeeping is the process of recording a business's financial transactions, such as its sales, purchases, payments, and receipts, on a daily basis. These records must be accurate and up-to-date and should be able to provide a clear picture of the performance of the business after a specific period. Whenever any individual or corporate body buys anything from you or sells anything to you, you have to record the exact details of the transaction and keep the documents used to transact the business as backup evidence. You would then use the individual records you have made to set up financial statements at the end of a period, which could be daily, weekly, monthly, or yearly. Bookkeeping may involve historical records, but these records are very vital to the success of any business. This book covers, WHAT IS BOOKKEEPING THE DIFFERENCES BETWEEN ACCOUNTING AND BOOKKEEPING THE IMPORTANCE OF BOOKKEEPING OF BOOKKEEPING FUNCTION OF AN ACCOUNTING OFFICER WHAT IS AN ASSET WHAT IS A CURRENT ASSETS WHAT IS A NON-CURRENT ASSETS LIABILITIES CURRENT LIABILITIES NON CURRENT LIABILITIES BALANCE SHEETS DEBITS AND CREDITS RECORDING DEBIT AND CREDIT IN AN ACCOUNT WHAT IS A FINANCIAL STATEMENT WHY DO WE NEED A FINANCIAL STATEMENT BALANCE SHEETS WHAT TO INCLUDE IN BALANCE SHEET INCOME STATEMENTS? UNDERSTANDING THE INCOME STATEMENT THE CASH FLOW STATEMENT BOTTOM LINE ON FINANCIAL STATEMENTS And much more! Here are some of the very important reasons for bookkeeping: - Bookkeeping provides a true and accurate picture of the business. To know how your business is performing, whether you are making gains or losses, growing or dwindling, the only way you can know these is if you keep accurate records. - There is the issue of taxes; you have to be able to know just how much taxes you need to pay at the end of every year. - It helps you easily forecast and create plans for your business. By looking at your bookkeeping records, you can easily say, "We always sell 500 units of X product every December, so this year, we should work on increasing our sales to XX units." - If you have investors or third parties such as shareholders or partners who would be interested in the performance of your business, well-kept books are the only way you can show them how your business is really doing. - Through bookkeeping, you can also easily figure out thefts, dishonesty, or poor performances if you have employees or people running your business for you. - Another benefit you can derive from adequate business bookkeeping is that you can use your financial statements as proofs of business performance if you need to secure loans for your business. - Bookkeeping shall also help you monitor your business expenses in relation to income. With that understanding on the importance of bookkeeping, let's now move on to understanding some key terms that are used in bookkeeping and accounting in general before we can get to the point of discussing how to go about bookkeeping. Are you ready to get started? Then scroll up and click the buy now button!

Understanding the Financial Score Oct 26 2022 Financial statements and information drawn from them confront us daily: in the media, in corporate annual reports, in the treasurer's reports for clubs or religious groups, in documents provided to employees and managers, as one considers alternative investments, in documents provided by homeowners' association and government agencies Various readers of a company's "financial score" make decisions based on financial information: the company's managers devise actions to improve operations; investors buy or sell the corporation's securities; creditors decide how much to lend; customers judge the reliability of this supplier; potential employees decide whether to invest their careers in the company. If you are training to be an accountant, find another book. This book's objective is to increase your ability to draw useful information from financial statements, and thus to make better decisions—in both your personal life and your professional life. Studying this book should help you be a better manager. That is both its objective and its perspective. The book starts at square one; it assumes no prior knowledge on your part. To increase your financial literacy, you will learn the common nomenclature (but not esoteric jargon) used by accountants and financial experts.
