Exotic animals range in appearance from truly striking to seemingly ordinary, and they live in wildlife preserves, on farms, in parks, and even in the wilderness across the United States. In this book, Elizabeth Cary Mungall provides ample information for anyone, from park visitor and zoo goer to rancher and wildlife

biologist, who wants to identify and learn more about exotic wildlife in the United States. Richard D. Estes, author of *The Safari Companion*, says that "for everyone interested in exotic hoofed stock, *Exotic Animal Field Guide* is a well-written and beautifully illustrated book that fills a vacant niche." Indeed, the main portion of the book contains fully illustrated species accounts of eighty different kinds of hoofed animals, with native range maps and information about food habits, habitat, temperament, breeding and birth seasons, and fencing needs. A list of exotics-related organizations and a reference section round out the text. Photographs of each species make the book both attractive and useful as a field tool. In a chapter on photographing exotics, Christian Mungall shows readers how to take their own great pictures of these animals. Clearly, as James G. Teer, of the Department of Wildlife and Fisheries Sciences at Texas A&M University states, this is "much more than a field guide. Elizabeth Cary Mungall's book is a long awaited repository and data source on the ecology, technology, and management of more than 80 species of non-native hoofed animals. . . . Anyone with exotics on his or her property will require *Exotic Animal Field Guide*." Photography is a big part of our lives, and we all take photos all the time. With this book, you'll learn how to get the right focus in your images, no matter what

the occasion. Follow along with your friendly and knowledgeable guide, and you will: Learn the top ten things to know about focus, including how to use the focus controls on the camera, how to pick the autofocus point, and when to use pre-focus in your images Address common autofocus issues such as dealing with low contrast or low light, or shooting through obstacles like glass or a fence Develop troubleshooting techniques for what to do when the autofocus doesn't work properly Work with both manual focus and autofocus and learn tricks to achieve better focus in video And once you've got the shot, show it off!
