Expressing Opinions in French and Australian English Discourse Mar 02 2023 Based on the analysis of conversations between French and Australian English speakers discussing various topics, including their experiences as non-native speakers in France or Australia, this book combines subjective personal testimonies with an objective linguistic analysis of the expression of opinion in discourse. It offers a new perspective on French and Australian English interactional style by examining the discourse markers I think, je pense, je crois and je trouve. It is shown that the prosody, intonation unit

position, and the surrounding context of these markers are all fundamental to their function and meaning in interaction. In addition, this book offers the first detailed comparative semantic study of the three comparative French expressions in interaction. The book will appeal to all those interested in linguistics, French and Australian English interactional style, cross-cultural communication, and discourse analysis. Students and teachers of French will be interested in the semantic analysis of the French expressions, the authentic interactional data and the personal testimonies of the participants.

Peace Psychology in Australia May 09 2021

This book is a case study of the development of peace psychology in Australia. While there is, in comparison to other countries, relatively little overt violence, Australia the nation was founded on the dispossession of Indigenous people, and their oppression continues today. Peace Psychology in Australia covers the most significant issues of peace and conflict in the country. It begins with a review of conflict resolution practices among Australia's ancient Indigenous cultures and succinctly captures topics of peace and conflict which the country has faced in the past 222 years since British settlement. The fast population growth, thriving

multiculturalism, leadership in international affairs and environmental isolation make Australia a microcosm for the study of human conflicts and peace movements.

Australia, Migration and Empire Sep 13 2021

This edited collection explores how migrants played a major role in the creation and settlement of the British Empire, by focusing on a series of Australian case studies. Despite their shared experiences of migration and settlement,

migrants nonetheless often exhibited distinctive cultural identities, which could be deployed for advantage. Migration established global mobility as a defining feature of the Empire. Ethnicity, class and gender were often powerful determinants of migrant attitudes and behaviour. This volume addresses these considerations, illuminating the complexity and diversity of the British Empire's global immigration story. Since 1788, the propensity of the populations of Britain and Ireland to immigrate to Australia varied widely, but what this volume highlights is their remarkable diversity in character and impact. The book also presents the opportunities that existed for other immigrant groups to demonstrate their loyalty as members of the (white) Australian community, along with notable exceptions which demonstrated the limits of this inclusivity.

Equality and Discrimination Law in Australia: An Introduction Jun 22 2022

Equality and Discrimination Law in Australia: An Introduction adopts a groundbreaking approach in its delivery of equality and discrimination law

principles. It analyses equality as a goal of the law, and acknowledges that to prevent discrimination modern laws must challenge the beliefs, practices, systems and structures that enable it.
