Hij zal zich moeten verantwoorden voor de Medische Tuchtraad. Over die Tuchtraad maakt hij zich niet echt zorgen: Een

schorsing van een paar maanden, daar komt het op neer. We kennen elkaar allemaal, meer zal het niet worden. Maar is het wel een medische fout? Marc had immers een rekening te vereffenen met zijn patiënt, die net iets te veel belangstelling toonde voor diens mooie vrouw Caroline. Of heeft het alles te maken met de gebeurtenissen in het zomerhuis waar het echtpaar Meier het gezin Schlosser had uitgenodigd? In Zomerhuis met zwembad vertelt de hoofdpersoon met niets en niemand ontziende eerlijkheid hoe hij op dit punt in zijn leven is aanbeland. Het is het spannende, maar ook geestige verhaal over het recht op vergelding en het overschrijden van grenzen als de deuren naar een normale rechtsgang zijn dichtgeslagen. This is the Student Solutions Manual to accompany Elementary Differential Equations, 11th Edition. Elementary Differential Equations, 11th Edition is

written from the viewpoint of the applied mathematician, whose interest in differential equations may sometimes be quite theoretical, sometimes intensely practical, and often somewhere in between. The authors have sought to combine a sound and accurate (but not abstract) exposition of the elementary theory of differential equations with considerable material on methods of solution, analysis, and approximation that have proved useful in a wide variety of applications. While the general structure of the book remains unchanged, some notable changes have been made to improve the clarity and readability of basic material about differential equations and their applications. In addition to expanded explanations, the 11th edition includes new problems, updated figures and examples to help motivate students. The program is primarily intended for undergraduate students of mathematics, science, or engineering, who typically take

a course on differential equations during their first or second year of study. The main prerequisite for engaging with the program is a working knowledge of calculus, gained from a normal two] or three] semester course sequence or its equivalent. Some familiarity with matrices will also be helpful in the chapters on systems of differential equations.
