Drifting is the newest, most exciting motorsport we have seen in the United States since the invention of the limited slip differential - it may be the most exhilarating contest of man and machine ever devised! From the winding mountain passes and desolate industrial roads of Japan, this unique sport of sliding a car sideways through a series of corners has become a huge hit in America. Drifting,

or dorifto as they call it in Japan, extracts the most exciting aspect auto racing, extreme oversteer, and makes it the focus of an intense and visually intoxicating new motor sport. *How to Drift: The Art of Oversteer* is a comprehensive guide to both the driving technique and car setup required for drifting. Successful Conversion to Unleaded Gasoline in Thailand Jun 14 2022 The Government of Thailand within a five-year period (1991-95) introduced a series of initiatives that resulted in the elimination of leaded gasoline and reduction of ambient lead by a factor of 10. This report describes the strategies the government employed: educating about the dangers of airborne lead; setting a lower at-pump price for unleaded gasoline; helping the oil companies establish a system

to distribute unleaded gasoline throughout the country; conducting monitoring and follow-up studies; and adjusting environmental regulations as necessary to support these policies.
