Social Work with the Aged and Their Families Sep 13 2021 In recent years, theoreticians, researchers, and practitioners have become increasingly interested in older adults and the aging process. This volume draws on related disciplines to better understand the biological, psychological, and social aspects of aging. 'Social Work with the Aged and Their Families' covers areas of central interest to those coping with the needs of an aging population. Among the topics addressed are assessment of the aging, taking into account biological age, psychological age, and socio-cultural and spiritual age. Greene also considers the importance of the family system, family roles and development, functional-age individual and family intervention, and group and community interventions. The scientific and systematic study of aging is known as gerontology. Geriatric social workers are those who have applied established social work theories in an attempt to find suitable techniques for working with their elderly clients. The need for specialized services has given birth to various services and programs. For example, meals-on-wheels and home health care services have been designed to meet specific physical needs of older adults. However, mental health services have lagged far behind as practitioners struggled to adapt such specialties as family therapy to families of later years. A major contribution of this book, now in its third edition, is the functional-age model of intergenerational treatment (FAM), which is an outgrowth of that demand. The functional-age model of intergenerational treatment is an integrative theoretical framework for social workers interested in clinical social work practice with older adults and their families. Since its initial construction in 1986, the model has been augmented by more recent concepts related to successful aging, spirituality, and resiliency. These additions, together with the original assessment and intervention strategies, present the major converging conceptual trends that constitute a model for twenty-first century social work practice in the field of aging.

Virtual Learning Environments: Concepts, Methodologies, Tools and Applications Nov 15 2021 As the world rapidly moves online, sectors from management, industry, government, and education have broadly begun to virtualize the way people interact and learn. *Virtual Learning Environments: Concepts, Methodologies, Tools and Applications* is a three-volume compendium of the latest research, case studies, theories, and methodologies within the field of virtual learning environments. As networks get faster, cheaper, safer, and more reliable, their applications grow at a rate that makes it difficult for the typical practitioner to keep abreast. With a wide range of subjects, spanning from authors across the globe and with applications at different levels of education and higher learning, this reference guide serves academics and practitioners alike, indexed and categorized easily for study and application.

Degrees That Matter Mar 02 2023 Concerned by ongoing debates about higher education that talk past one another, the authors of this book show how to move beyond these and other obstacles to improve the student learning experience and further successful college outcomes. Offering an alternative to the culture of compliance in assessment and accreditation, they propose a different approach which they call the Learning System Paradigm. Building on the shift in focus from teaching to learning, the new paradigm encourages faculty and staff to systematically seek out information on how well students are learning and how well various areas of the institution are supporting the student experience and to use that information to create more coherent and explicit learning experiences for students. The authors begin by surveying the crowded terrain of reform in higher education and proceed from there to explore the emergence of this alternative paradigm that brings all these efforts together in a coherent way. The Learning System Paradigm presented in chapter two includes four key elements—consensus, alignment, student-centeredness, and communication. Chapter three focuses upon developing an encompassing notion of alignment that enables faculty, staff, and administrators to reshape institutional practice in ways that promote synergistic, integrative learning. Chapters four and five turn to practice, exploring the application of the paradigm to the work of curriculum mapping and assignment design. Chapter six focuses upon barriers to the work and presents ways to start and options for moving around barriers, and the final chapter explores ongoing implications of the new paradigm, offering strategies for communicating the impact of alignment on student learning. The book draws upon two recent initiatives in the United States: the Tuning process, adapted from a European approach to breaking down siloes in the European Union educational space; and the Degree Qualifications Profile (DQP), a document that identifies and describes core areas of learning that are common to institutions in the US. Many of the examples are drawn from site visit reports, self-reported activities, workshops, and project experience collected by the National Institute for Learning Outcomes Assessment (NILOA) between 2010 and 2016. In that six-year window, NILOA witnessed the use of Tuning and/or the DQP in hundreds of institutions across the nation. Sponsored by the National Institute for Learning Outcomes Assessment (NILOA)

Cases in Public Relations Management Jul 31 2020 Intended for a junior/senior level course in Public Relations, this case study textbook takes a different approach to teaching students about the public relations world. Most case study textbooks deconstruct prize-winning campaigns that show one path to meeting a challenge or an opportunity. *Cases in Public Relations Management* uses recent cases with outcomes that weren't always successful and challenges students to think analytically, strategically and practically. Each case is designed to encourage discussion, debate and exploration of the options available to the strategic public relations manager today.

The Dark X May 09 2021 At home in San Francisco, between research trips to Africa, renowned primatologist Suzanne Albrecht finds herself suffering from an unexplained fever. Dr. Tony Miller, one of the sharpest diagnosticians in San Francisco, is determined to uncover the cause. But Suzanne doesn't have time for hospitals and multitudes of tests; she's scheduled to return to Africa to continue her research on the bonobos, a species of pygmy chimpanzees. Still concerned about her medical condition, she persuades the single handsome doctor to accompany her on her trip abroad. Tony accepts the invitation, but once in Africa, he soon finds himself facing perils he hadn't imagined. Not only do Tony and Suzanne become embroiled in a tense political situation that almost costs them their lives, but Suzanne's condition continues to worsen. Tony must solve the riddle of Suzanne's mysterious illness while confronting his true feelings about Suzanne, who is an enigma herself.
