*Transnational Asia Pacific* Apr 08 2021 From fiddle tunes to folk ballads, from banjos to blues, traditional music thrives in the remote mountains and hollers of West Virginia. For a quarter century, Goldenseal magazine has given its readers intimate access to the lives and music of folk artists from across this pivotal state. Now the best of Goldenseal is gathered for the first time in this richly illustrated volume. Some of the country's finest folklorists take us through the backwoods and into the homes of such artists as fiddlers Clark Kessinger and U.S. Senator Robert Byrd, recording stars Lynn Davis and Molly O'Day, dulcimer master Russell Fluharty, National Heritage Fellowship recipient Melvin Wine, bluesman Nat Reese, and banjoist Sylvia O'Brien. The most complete survey to date of the vibrant strands of this music and its colorful practitioners, *Mountains of Music* delineates a unique culture where music and music making are part of an ancient and treasured heritage. The sly humor, strong faith, clear regional identity, and musical convictions of these performers draw the reader into families and communities bound by music from one generation to another. For devotees as well as newcomers to this infectious joyous and heartfelt music, *Mountains of Music* captures the strength of tradition and the spontaneous power of living artistry.

Principles of Macroeconomics Asia-Pacific Edition with Online Study Tool S 12 Months Apr 20 2022 The brief and student-friendly approach of this book boils economics down to its essentials, by considering what is truly important for students to learn in their first course in economics. In keeping with the authors' philosophy of showing students the power of economic tools and the importance of economic ideas, this edition pays careful attention to regional and global policies and economic issues ' including the impacts of the ongoing global financial crisis, inflation, unemployment, interest rates, and monetary and fiscal policy. Continuing global financial uncertainty and the current state of the Australian economy provide a constant supply of new material, re-evaluated models, and policy changes and updates for the Principles of Macroeconomics text. The book emphasises the material that students should and do find interesting about the study of the economy, resulting in a focus on applications and policy, and less on formal economic theory. Principles of Macroeconomics, 7e encourages students to make their own judgements by presenting both sides of the debate on five controversial issues facing policymakers: the proper degree of policy activism in response to the business cycle, the choice between rules and discretion in the conduct of monetary policy, the desirability of reaching zero inflation, the importance of balancing the government's budget, and the need for tax reform to encourage saving.

**Chinas Digital Presence in the Asia-Pacific** Dec 04 2020 China's Digital Presence in the Asia-Pacific explores China's digital presence in the Asia-Pacific region. Drawing on political economy of the media, industry analysis, platform studies and cultural policy studies, the book shows that China's commercial digital platforms are increasingly recognized outside China and can disseminate Chinese culture more effectively than government supported media. It illustrates how these platforms are contributing to Chinese cultural influence, their perceived reputation and obstacles in the region while pursuing a combined approach of culture+, industry+, internet+, and platform+. In considering the multi-layered rise of the China argument, the book considers its growing technological status as an innovative nation through four policy approaches: culture+, industry+, Internet+ and platform+. Other + characterizations include intelligent+ and social+. These + characterizations show how China is rejuvenating, drawing technological knowhow from the region and adding to its cultural (and soft) power. The book focuses on six locations: Hong Kong, Taiwan, Singapore, Malaysia, Australia and New Zealand. The authors analyse Beijing's changing policies towards the governance of culture, Internet

technologies and digital platforms, as well as examining consumer perceptions of China and Chinese products in the Asia-Pacific region. In using the + characterizations, the authors provide a comprehensive analysis of how Chinese cultural and creative industries became digital, as well as investigating the key players and the leading platforms including Alibaba, Tencent, ByteDance, TikTok, Baidu, iQiyi and Meituan.

*INTEGRATED MARKETING COMMUNICATIONS (3rd Asia Pacific Ed.)*. May 29 2020

**International Security in the Asia-Pacific** Feb 06 2021 This volume argues that international security in the Asia-Pacific lends itself to contradictory analyses of centrifugal and centripetal trends. Transitional polycentrism is intrinsically awkward as a description of the security of states and their populations; it implies the loosening of state control and the emergence of newly asserted authority by mixed constellations of intergovernmental organizations and non-state actors. It implies a competition of agendas: threats to the integrity of borders and human security threats such as natural disasters, airliner crashes, and displacement by man-made pollution and food scarcity. Conversely, polycentrism could also imply a return to a more neo-realist oriented international order where great powers ignore ASEAN and steer

regional order according to their perceived interests and relative military superiority. This book embraces these contradictory trends as a foundation of analysis and accepts that disorder can also be re-described from the perspective of studied detachment as polycentric order.

***The United States in the Asia-Pacific since 1945*** Dec 24 2019 In a fast-moving and incisive narrative, Roger Buckley examines America's close and continuous relationship with the Asia-Pacific region from the end of the Pacific War to the first days of the Presidency of George W. Bush. The author traces the responses of the United States government to the major crises in the area through the Cold War decades and the initial post-Cold War years. He demonstrates how the US sought to maintain its dominant regional position through a series of security alliances and its own political, military and economic strengths. Professor Buckley examines the subject from geopolitical perspectives to provide a gateway to the understanding of a complex region certain to be of global importance in the twenty-first century.

**The Synergy Trap, Asia-Pacific Edition** Jul 23 2022 "Every CEO and Corporate Director who has been in the path of the 'WOW! GRAB IT!' acquisition locomotive should read this book!" -- Charles R. Shoemate, Chairman and CEO, Bestfoods With global acquisition activity running into the trillions of dollars, the acquisition alternative continues to be the favorite corporate growth strategy of this generation's executives. Unfortunately, creating shareholder value remains the most elusive outcome of these corporate strategies. After decades of research and billions of dollars paid in advisory fees, why do these major decisions continue to destroy value? Building on his groundbreaking research first cited in Business Week, Mark L. Sirower explains how companies often pay too much -- and predictably never realize the promises of increased performance and competitiveness -- in their quest to acquire other companies. Armed with extensive evidence, Sirower destroys the popular notion that the acquisition premium represents potential value. He provides the first formal and functional definition for synergy -- the specific increases in performance beyond those already expected for companies to achieve independently. Sirower's refreshing nuts-and-bolts analysis of the fundamentals behind acquisition performance

cuts sharply through the existing folklore surrounding failed acquisitions, such as lack of "strategic fit" or corporate culture problems, and gives managers the tools to avoid predictable losses in acquisition decisions. Using several detailed examples of recent major acquisitions and through his masterful integration and extension of techniques from finance and business strategy, Sirower reveals: The unique business gamble that acquisitions represent The managerial challenges already embedded in current stock prices The competitive conditions that must be met and the organizational cornerstones that must be in place for any possibility of synergy The precise Required Performance Improvements (RPIs) implicitly embedded in acquisition premiums and the reasons why these RPIs normally dwarf realistic performance gains The seductiveness and danger of sophisticated valuation models so often used by advisors The Synergy Trap is the first expose of its kind to prove that the tendency of managers to succumb to the "up the ante" philosophy in acquisitions often leads to disastrous ends for their shareholders. Sirower shows that companies must meticulously plan -- and account for huge uncertainties -- before deciding to enter the acquisition game. To date, Sirower's work is the most comprehensive and rigorous, yet practical, analysis of the drivers of acquisition performance. This definitive book will become required reading for managers, corporate directors, consultants, investors, bankers, and academics involved in the mergers and acquisitions arena.

**Pacific Asia?** Jul 11 2021 Emphasizing human and environmental security over traditional power politics, Mel Gurtov offers a provocative reinterpretation of security in the Asia-Pacific region. The author questions a number of prevailing assumptions, such as the China threat, a U.S.-centered balance of power, and the necessity of a greater Japanese security role. He argues instead for a cooperative framework for future security that focuses on people's basic needs, is sensitive to Asian nationalism, and gradually replaces military power with developmental priorities. With its concise appraisals of the security policies of the United States, China, Japan, the two Koreas, and the ASEAN countries, this work will be a valued reference for policymakers, scholars, and students alike.
