Focused on the appreciation of anthropology, the new edition of *Cultural Anthropology: Appreciating Cultural Diversity* offers an up-to-date holistic introduction to cultural anthropology. Key themes of appreciating the experiences students bring to the classroom, appreciating cultural diversity, and appreciating the field of anthropology are showcased throughout the text. In this edition, *Understanding Ourselves* chapter openers and *Through the Eyes of Others* boxes show how anthropology helps us understand ourselves. New *Appreciating Diversity* boxes focus on the various forms of human biological and cultural diversity. *Appreciating Anthropology* boxes are also new to the text and focus on the value and usefulness of anthropological research and approaches. What is cultural anthropology, and how is it relevant in today's world? Robert L. Welsch and Luis A. Vivanco's *Cultural Anthropology: Asking Questions About Humanity* uses a questions-based approach to teach students how to think anthropologically, helping them view cultural issues and everyday experiences as an anthropologist might. Inspired by the common observation that 99 percent of a good answer is a good question, *Cultural Anthropology: Asking Questions About Humanity* combines a question-centered pedagogy with the topics typically covered in an introductory course. It emphasizes up front what the discipline of anthropology knows and which issues are in debate, and how a cultural perspective is relevant to understanding social, political, and economic dynamics in the contemporary world. *Cultural Anthropology: Asking Questions About Humanity* also represents an effort to close the gap between the realities of the discipline today and traditional views that are taught at the introductory level by bringing classic anthropological examples, cases, and analyses to bear on contemporary questions. Now fully updated, this third edition includes entries on: Material Culture Environment Human Rights Hybridity Alterity Cosmopolitanism Ethnography Applied Anthropology Gender Cybernetics With full cross-referencing and revised further reading to point students towards the latest writings in Social and Cultural Anthropology, this is a superb reference resource for anyone studying or teaching in this area. This volume on cultural anthropology presents a Christian perspective for Bible school students of conservative evangelical backgrounds. The hope is that a sympathetic approach to the problems of cultural diversity throughout the world will help young people overcome typical North American cultural biases and bring understanding and appreciation for the diversities of behavior and thought that exist in a culturally heterogeneous world. Grunlan and Mayers take the position of "functional creationism"; and though they discuss some of the problems implied in traditional interpretations of the age of the world and especially of the creation of the human race, they do not attempt to deal with either physical anthropology or the origins of man. They do, however, attempt to deal meaningfully with the problems posed by biblical absolutism and cultural relativism, and their practice. Concluding chapters with a series of thought-provoking questions should prove to be of real help to both the professional and nonprofessional teacher of anthropology. 'Als je wilt weten wat antropologie is, moet je kijken naar wat antropologen doen,' zo schrijven de auteurs van dit Elementaire Deeltje. In deze boeiende introductie op dit vakgebied komen dus, naast de belangrijkste principes en methodes, veel voorbeelden aan bod van de antropoloog aan het werk. Puttend uit hun eigen ervaringen in Indonesië en Midden-Amerika bespreken de auteurs de wijze waarop sociale en culturele antropologie ons begrip over de menselijke samenleving en cultuur hebben helpen vormen. Written by one of the most famous modern anthropologists, the fifth edition of *Cultural Anthropology* continues to focus on the book's two major objectives. First, it presents a holistic view of sociocultural systems, and secondly, the book provides a unified theoretical framework for explaining these systems. It also remains faithful to the belief that anthropologists must routinely deal with facts and theories that are crucial to informed decisions regarding issues of enduring relevance. The cultural approach used throughout furnishes a framework for explaining how the parts of sociocultural systems are interrelated and how they change over time. The book also continues in its effort to identify the many causal strands that help explain the process of sociocultural change. It tries to make sense of the many seemingly irrational or arbitrary customs and institutions in small, technologically simple societies as well as complex nations. For anyone interested in the study of culture. Practical and accessible, this dictionary is designed to enlighten those newly engaged in anthropological study or seeking a quickguide to the field. Fills a need for a beginner's pocket guide to the far-reaching and complex field of anthropology, including over 800 detailed entries and the intellectual background of terms. Written in plain, jargon-free language, for readers without extensive background in the field. Features brief, conceptual definitions of terms, bibliographical references to anthropological classics, related works for background reading and further research. The user-friendly format includes bold terms featured elsewhere in the book, extensive cross-references, and indexes of names, peoples, places and subjects. Incorporates related terminology from allied fields such as sociology, economics and geography. Not a textbook in the ordinary sense, this work offers a vision of how anthropology - a discipline that operates through intimate knowledge of local societies - can offer vastly increased understanding of society and culture even in this age of mass communication. In its examination of topics ranging as far afield as the mass media, environmental and development issues, kinship and suffering in transnational settings, the politics of both the nation-state and the local community, the arts, cosmologies of science as well as religion, and the relationship between social life and history, this book is not just about an academic discipline; it is about the theoretical as well as ethical commitments that have enabled anthropologists to play a leading role in the critique of racism and other forms of intolerance. *Cultural Anthropology: Global Forces, Local Lives* helps students understand the application of anthropological concepts to the contemporary world. It offers an exceptionally clear and readable introduction to cultural anthropology, closely relating it to key topics such as colonialism and post-colonialism, ethnicity, the environment, cultural change, economic development and globalisation. This second edition includes additional material on medical, urban and political anthropology, as well as increased coverage of religion and culture, with particular focus on Islamic societies. An updated and expanded range of case studies explores the diverse nature of anthropology through appealing subjects as "Blue Jeans Going Global" and "Migrating Brides in Northern India." Students will especially welcome the additional focus on careers in anthropology and how it is used in everyday life. The design of this second edition has various aids to facilitate student learning: A wealth of additional color images help bring concepts and theories to life. Explains difficult key terms with marginal glosses and promotes further reading with "key texts" feature. Assists study with boxed chapter summaries, an extensive bibliography and index. Exclusive to purchasers of this new edition is 12-month access to the Routledge Interactive version of your textbook, including audio introductions from the author, exclusive supplementary case studies and study guides, and quiz material to test your learning. **HUMANITY: AN INTRODUCTION TO CULTURAL ANTHROPOLOGY**, Eleventh Edition, offers a solid framework centered on globalization and culture change. The text's engaging narrative provides new ways of looking at many of the challenges facing the world in this century, as students examine ethnic conflicts, globalization of culture and language, recent debates about gay marriage, increasing inequalities, population growth, hunger, and the survival of indigenous cultures. Throughout this highly acclaimed work, Peoples and Bailey explore the diversity of humanity and clearly demonstrate why an appreciation and tolerance of cultural differences is critical today. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. **Linguistic Anthropology: A Reader** is a comprehensive collection of the best work that has been published in this exciting and growing area of anthropology, and is organized to provide a guide to key issues in the study of language as a cultural resource and speaking as a cultural practice. Revised and updated, this second edition contains eight new articles on key subjects, including speech communities, the power and performance of language, and narratives. Selections are both historically oriented and thematically coherent, and are accessibly grouped according to four major themes: speech community and communicative competence; the performance of language; language socialization and literacy practices; and the power of language. An extensive introduction provides an original perspective on the development of the field and highlights its most compelling issues. Each section includes a brief introductory statement, sets of guiding questions, and list of recommended readings on the main topics. **Critics against Culture: Anthropological Observers of Mass Society**--a collection of essays on the history of anthropology focused on Benedict, Boas, Sapir, and modernist thought by one of American anthropology's leading scholars--explores the roots of anthropology's early involvement with the study of American society. The essays making up this volume, focused on the critique of mass society and the history of the culture concept, examine Boasian anthropologists as critics of mass society. The book also includes two new, unpublished essays: one on Alexis de Tocqueville and Margaret Mead, the other on Jules Henry and Richard Hoggart. Handler offers a striking analysis of Boasian cultural criticism and the intersection between anthropology, American studies, and cultural studies. During its first six years (1986-1991), the journal *Cultural Anthropology* provided a unique forum for registering the lively traffic between anthropology and the emergent arena of cultural studies. The nineteen essays collected in *Rereading Cultural Anthropology*, all of which originally appeared in the journal, capture the range of approaches, internal critiques, and new questions that have characterized the study of anthropology in the 1980s, and which set the agenda for the present. Drawing together work by both younger and well-established scholars, this volume reveals various influences in the remaking of traditions of ethnographic work in anthropology; feminist studies, poststructuralism, cultural critiques, and disciplinary challenges to established boundaries between the social sciences and humanities. Moving from critiques of anthropological representation and practices to modes of political awareness and experiments in writing, this collection offers systematic access to what is now understood to be a fundamental shift (still ongoing) in anthropology toward engagement with the broader interdisciplinary stream of cultural studies. The text provides a clear overview of anthropology, focusing on central topics such as kinship, ethnicity, ritual and political systems, offering a wealth of examples that demonstrate the enormous scope of anthropology and the importance of a comparative perspective. Unlike other texts on the subject, *Small Places, Large Issues* incorporates the anthropology of complex modern societies. Using reviews of key monographs to illustrate his argument, Eriksen's lucid and accessible text remains an established introductory text in anthropology. This new edition is updated throughout and increases the emphasis on the interdependence of human worlds. There is a new discussion of the new influence cultural studies and natural science on anthropology. Effortless bridging the perceived gap between 'classic' and 'contemporary' anthropology, *Small Places, Large Issues* is as essential to anthropology undergraduates as ever.
