Zoology for Degree Students (For B.Sc. Hons. 2nd Semester, As per CBCS) Oct 16

2022 This textbook has been designed to meet the needs of B.Sc. (Hons.) Second Semester students of Zoology as per the UGC Choice Based Credit System (CBCS). Comprehensively written, it explains the essential principles, processes and methodology of Coelomate Non-Chordates and Cell Biology. This textbook is profusely illustrated with well-drawn labelled diagrams, flow charts and tables, not only to supplement the descriptions, but also for sound understanding of the concepts.

***Environmental Hydraulics. Volume 2 Feb 20 2023* Over the last two decades environmental hydraulics as an academic discipline has expanded considerably, caused by growing concerns over water environmental issues associated with pollution and water balance problems on regional and global scale. These issues require a thorough understanding of processes related to environmental flows and transport phenomena, and the development of new approaches for practical solutions. Environmental Hydraulics includes about 200 contributions from 35 countries presented at the 6th International Symposium on Environmental Hydraulics (Athens, Greece, 23-25 June 2010). They cover the state-of-the-art on a broad range of topics, including: fundamentals aspects of environmental fluid mechanics, environmental hydraulics problems of inland, coastal and ground waters, interfacial processes; computational, experimental and field measurement techniques, ecological aspects, and effects of global climate change.**

Environmental Hydraulics will be of interest to researchers, civil/environmental engineers, and professional engineers dealing with the design and operation of

environmental hydraulic works such as wastewater treatment and disposal, river and marine constructions, and to academics and graduate students in related fields.

The University of Idaho Bulletin Nov 17 2022

Organic Chemistry II as a Second Language Nov 12 2019 Building on the resounding success of the first volume (0-471-27235-3), *Organic Chemistry as a Second Language, Volume 2* provides readers with clear, easy-to-understand explanations of fundamental principles. It explores the critical concepts while also examining why they are relevant. The core content is presented within the framework of predicting products, proposing mechanisms, and solving synthesis problems. Readers will fine-tune the key skills involved in solving those types of problems with the help of interactive, step-by-step instructions and problems.

Advocating for English Learners Dec 06 2021 Embrace the future by ensuring English Learners have a voice in school. English Learners (ELs) are the fastest-growing segment of the K-12 population. Therefore, educators must provide a voice for their needs. This book demystifies the techniques of advocacy for ELs, including: A shared sense of responsibility for EL success-Providing tools that every educator can use to ensure that ELs are effectively served An overview for administrators-Influencing policy and fostering a culture that meets EL needs Advocacy for ELs' success beyond Grade 12-Equipping ELs for life after graduation, from higher education to career decisions

Botany for Degree Students (For B.Sc. 2nd Semester, As per CBCS) Sep 22 2020 This textbook has been designed to meet the needs of BSc Second Semester students of Botany as per the UGC Choice Based Credit System (CBCS). It acquaints students with abiotic and biotic components of the ecosystem and their

interactions at different levels. It also covers origin of angiosperms, their phylogeny and classification using various methods. While it provides strong conceptual understanding of the subject, it also helps in developing scientific outlook of the student.

Chemistry for Degree Students B.Sc. Semester - II (As per CBCS) Dec 18 2022
This textbook has been designed to meet the needs of B.Sc. Second Semester students of Chemistry as per the UGC Choice Based Credit System (CBCS). With its traditional approach to the subject, this textbook lucidly explains principles of chemistry. Important topics such as chemical energetics, chemical/ionic equilibrium, aromatic hydrocarbons, alkyl/aryl halides, alcohols, phenols, ethers, aldehydes and ketones are aptly discussed to give an overview of physical and organic chemistry. Laboratory work has also been included to help students achieve solid conceptual understanding and learn experimental procedures.
